Subject: GRSG: 3/24: WAFWA invasive report briefing

Dear all,

To follow up from emails of a few weeks ago, in regard to the WAFWA *Wildfire and Invasive Species Working Group* upcoming report titled **Invasive Plant Management and GRSG** (summary attached):

I wanted to alert you that Sarah Greenberger let me know yesterday that she has set a time of noon eastern on March 24 for a briefing of appropriate bureau and DOI officials. Ken Mayer of WAFWA will present the report and recommendations. As I mentioned, the report paints a fairly challenging picture, and, per Sarah, some of the report's recommendations are consistent with recommendations coming from those working on climate change issues. I won't be able to attend but it looks like Richard Hannan will represent our sage-grouse team. I am hoping that the briefing can 1) ensure appropriate people are aware of the report before its release to the public and 2) help us gain some momentum to pursue solutions to the challenges outlined in the report.

Please let us know if you have any questions or concerns or want to discuss.

Thanks,
Noreen
