Subject: follow-up to call

If it helps for discussion purposes, the objective language would look something like, subject to editing (potentially lots!)

> *If the BLM finds that implementation of Oregon GRSG Habitat Conservation Program is effective in meeting management goals and objectives for GRSG for conservation, the BLM, in coordination with the State of Oregon and the U.S. Fish and Wildlife Service, and based on best available scientific information, may revise the management decisions and associated GRSG habitat management area maps through a plan amendment, as appropriate to achieve our shared goal of consistent and effective GRSG management and conservation across all lands regardless of ownership.*
