Most of the newly breaking information is USGS reports. I would NOT think that we want to take the lead to report on those…..but you all may disagree. Carol or Deb Fischer should be there.

Also, the Integrated Rangeland Fire Management Strategy progress is timely but that is really a DOI lead and I don't know if Jim Lyons is going to be there to cover that.

Lastly, our desire to continue working with the states on sage-steppe ecosystem conservation into the future, continuing the close partnership regardless of our decision, collaborating on science information needs for grouse and other sage-dependent species, coordinating management actions, and sharing information about progress and accomplishments is something you could focus on. As in, this is the beginning not the end of this effort.

Please pass along my apologies for not being there and thank you for being willing to rep us.

Call me if you want to talk more.

> Richard,

Noreen indicated that you would be the USFWS rep on the EOC next week. She said you would be giving a general USFWS update. Virgil asked if you could cover any additional information that may have entered the administrative record since the July meeting (I think everyone is aware of the WAFWA population trend report, anything else)? He was interested in any new info that might be of interest to the group in total, not necessarily the insignificant things.

Thanks,

SS
