Ken –

I think Dawn keeps an active list of FWS folks most actively involved in invasives weed management – we'll work on developing that list

Subject: Invitees to weed summit

If you're in a state that's impacted by Greater Sage Grouse management, or even if you're interested in coordinated weed policy in the west, please send me a list of people to invite to the upcoming summit on GRSG & weeds in November in Boise, ID.

The ideal invitee will be someone conversant with on-the-ground weed management issues as well as

policy and administrative structure. We want attendees who can contribute to a specific action plan on how best to approach the issue of weeds and sagebrush steppe habitat in the future.

We also aim to have GRSG people participate as well. We hope to have participants from all government levels, as well as engaged NGOs.

We will be sending out a save-the-date email soon. Please consider putting a quick list together this week. It should have the name, affiliation, and email address of the invitee. Excel spread sheets are welcome.

With the right group of people involved, we can keep the ball rolling forward on this issue.

Thanks,
Dean
