---

Thanks Ren, we're working to pull together a webinar for our next call on Nov 25, this will be very helpful as we pull our thought together – lot of overlap with what we were thinking

Terry

I think we have a call next week to discuss mitigation issues. The Barrick situation is lending a sense of urgency - we need to get it right as it will be precedent setting.

Normally I wouldn't want to get this "in the weeds" but again, the issues involved with mitigating for loss of sage grouse habitat and disturbance are front and center with the BLM/FS/State plans.

Richard suggested I send you these thoughts and if you find merit, perhaps share them with the Portland folks before the phone call.

thanks
Ren
