I don't Sue, sorry. I copied Shauna Ginger on the theory that she might be able to find out since FWS did the map. You were referring to the new sage grouse map mentioned in earlier message, right?

Sara - do you know if I can get a GIS shapefile of this map?

Sara,

I originally sent the attached reprint to Garth, who I thought was the person making the request. I see in your meeting notes that the request may have been broader than that. I thought I would send the attachment to you and ask if you thought it should go to the entire group.

Thanks,

Tony
