Hi Jeff,

Thank you for the reminder that Jodie is the technical lead for you folks. I will add her to the group email list.

Cheers,
Theresa

Jodie and I met after and feel it is important that she stay engaged in this workgroup/issue, as she is our "technical" lead for these kinds of efforts. I also think that the overlap will be helpful in case one of us cannot participate in something, similar to the approach we have taken with Angela and I on the Habitat Fragmentation workgroup.

Hi Jeff,

Thanks for the analysis of the state plans. Also, it was great to have Jodie. Should I add her to the regular email list?

Theresa

Cathy and Theresa –

I've asked Jodie Delevan to attend the disturbance meeting with me tomorrow morning. She is our technical lead on sage grouse, and is much more well versed in some of the science behind this issue than I am. I have a verbal commitment from her that she will meet me there at 8:30am.

I am extremely sensitive to the issue of having our meetings get too big – to the point where they are no longer as functional or productive as they could be. This happens within the FWS all the time. I do not take adding folks to the meeting lightly, and I would not have extended the invite if I didn't feel like her professionalism and expertise were tremendously value added to our efforts. My apologies for not having the time to vet this through you beforehand – it's been another one of those weeks - but I'm sure Jodie's insight will help us be successful.

Thanks in advance. Cheers,

J-
