Date: Tuesday, March 17, 2015 11:26:39 AM

Pondering two different ways of representing plans submitted, but the information submitted does not show any efforts to abate threats of equids.

3	**Brood-rearing areas fenced to exclude equids**	**53 ac**	**2**	**Completed**
	Conservation Plans	**None submitted**	**N/A**	**Information submitted does not address the threat of equids**

or

6	**None submitted that address the threat of equids**	**N/A**	**N/A**	**N/A**
7	None submitted that address the threat of equids

Here is what I have so far for equids (which is a relatively easy example)
- Although - are we only putting the in progress ones here? The completed ones should go elsewhere? I'm confusing myself! Can't remember how bi-state was structured, difference between threats already abated and PECE - the in progress ones are evaluated with PECE.

Table 2: List of Conservation Efforts (ameliorating threat described in this chapter) by management zone

Management Zone	Type of Conservation Effort	Sum of Acres or Miles	Number of Actions	Notes
1	None submitted	N/A	N/A	N/A
2	Conservation Plan	None submitted	N/A	In Progress
3	Brood-rearing areas fenced to exclude equids	53 ac	2	Completed
4	Brood-rearing areas fenced to exclude equids	105 ac	2	Completed
5	Brood-rearing areas fenced to exclude equids	13,761 ac	10	Completed
	Brood-rearing areas fenced to exclude equids	10,251 ac	2	In Progress
	Horse gathers	2,957 equids	2	Completed
6				

7

Note – Not all the fences state excluding from brood-rearing/riparian areas. May need to split between brood-rearing and misc fences.

Not sure if this helps at all. As I said, equids are an "relatively" easy example.
