Explanatory Notes

Numbers reported in the monthly status report should be treated as tentative data. These are based on the best information available each month from cooperators in the field and facilities. If a reporting error is discovered after posting online, no correction will be disseminated, unless the error is substantive. Occasionally, a missing bird will continue to be reported live each month until field personnel are satisfied that there is little likelihood it is still alive. For such individuals, the date last detected normally is presumed to be the date of death. Questions about these summaries should be directed to : steve_kirkland@fws.gov.

SB# - Condor Studbook number.

"CAPTIVE POPULATION" includes:
-birds captured from the wild prior to 1988 that are still in a captive facility (e.g., zoo)
-previously released birds returned to captivity permanently or for care and possible RE-release
-captive-hatched birds retained for captive breeding
-young birds held in breeding facilities in preparation for transfer to a field pen for release
-"mentor birds" from a captive facility transferred temporarily into a field pen to aid socialization of pre-release birds
-birds transferred from a captive facility to a field pen in preparation for initial release or RE-release

- LAZ is Los Angeles Zoo; SDZSP (San Diego Zoo Safari Park) is Zoological Society of San Diego; WCBP is World Center for Birds of Prey, The Peregrine Fund; OZ is Oregon Zoo; MZ is Mexico Zoo; V(VWS), BS (Big Sur) is Ventanna; P(PNP) is Pinnacles; SDZ is San Diego Zoo; SBZ is Santa Barbara Zoo.

“Released” (rel'd) refers to birds raised in captivity and introduced to the wild at a second location; and to birds captured prior to 1988 that were returned to the wild after 1995.

“RE-released” refers to previously released birds that were re-captured temporarily and held in field pens, or that were re-captured for long-time care or observation in breeding facilities, and that were later returned to the wild population.

"WILD POPULATION" includes:
-free-flying birds recently accounted for
-free-flying birds, assumed to be alive, although not recently accounted for
-nestlings in wild nests

"California" refers to combined birds of SoCal, Ventana, & Pinnacles National Park.

"So. Calif.""SoCal""sc" refers to birds originally released at sites from San Luis Obispo County to Ventura County by the U.S. Fish and Wildlife Service Hopper Mountain National Wildlife Refuge Complex.

"Central CA." refers to birds originally released at sites north of San Luis Obispo County by the Ventana Wildlife Society **"VWS"** & Pinnacles National Monument **"PNM"** (presently National Park). Birds released in these two California release areas now freely intermingle.

“Baja Calif.” refers to birds originally released in Baja California, Mexico, by the Zoological Society of San Diego, the Centro de Investigación Científica y de Educación Superior de Ensenada, and the Instituto Nacional de Ecología.

"Arizona" refers to birds released by The Peregrine Fund in Arizona and that range in Arizona and other states east of California.

Mortalities requiring law enforcement investigation often will not be publicly reported immediately.
