Thanks Ed.

And….can you verify that the actions items identified in the short term plan for the S.O. were completed? Anything you can provide that allows us to build the right track record would be hugely beneficial for our efforts.

thanks

Terry,Dawn, Rich and Noreen,
I forwarded your emails on to Amy Lueders, Ron Dunton and others for a response. In my new role as NOC Director I won't be in the "driver's seat" on future allocation decisions. I will however be engaged in tracking implementation of the GrSG plans, FIAT and Resilient Lands projects. Amy and Ron lead the allocation decision process from the Resources and Fire program sides. Rex McKnight is leading the FIAT effort and will be working with others on Resilient Landscapes program. I believe he will be taking the lead on responding to your queries about data. I believe that Amy and/or Ron will respond with regard to allocation decisions. ed

Also, if you could provide any additional commitments beyond the $4 million in projects that the BLM will implement across the Great Basin in FY15.

Ed –

I was wondering if there's any way of getting some more info on the FIAT plans – I know your folks are working on this, but haven't been able to provide it as of yet, and we're heading down our path as we speak – specifically, we desperately need a geospatial analysis of the prioritized areas that have some NEPA done, since those would have the highest certainty of being done. The exchange between Doug and Dawn indicates there are some competing priorities – that maybe preparing for the current fire season and our needs may be a distant second to that, but it would be extremely helpful for our work to get that info. Also, it would be useful to get an idea from BLM on their continued commitment to fire, including continuation of the Resiliant Landscapes Program, which awarded 10 million to 10 projects.

Since that program used existing dollars, it would be nice to get a commitment from BLM on continuing to move forward with this, using the 10 million plus whatever adds they get. And any other commitments they can make now based on the Secretarial Order which relies a lot on future allocations but also has some commitments to prioritizing with existing dollars.

Dawn – anything to add, please do so.

Thanks
