On Thu, Mar 26, 2015 at 12:51 PM, Olenicki, Thomas <thomas_olenicki@fws.gov> wrote:

Might provide a way to get data that would help define habitat and potential areas of occurrence for listed species - e.g. for species maps discussed during the regional call and working with MNHP. Decide which species would most benefit from LiDar to pick an are for data acquisition.

On Thu, Mar 26, 2015 at 8:10 AM, McGrath, Mike <mike_mcgrath@fws.gov> wrote:

FYI--When I first had ArcGIS installed on my computer a couple of years ago, I was signed up for the Service's GIS listserver. This message came across the other day regarding the acquisition of LiDAR data. I don't know if folks in our office have a need for it (Karen and David?), but it sounds as though they are looking for input.

I saw that and was going to look into it more. Unfortunately, we have a major power outage here. Only the Visitor Center has power (I'm using a computer there) and since out server is in a building that has no power, we have no network.
