Subject:	Re: Possible electric data to add to the infrastructure work?
Date:	Wednesday, March 11, 2015 4:05:25 PM

Let me do some digging. I didn't address any power generation sources, just the lines that connect them to the grid. I'll have to check the oil, gas, coal, etc. chapters. And maybe have a convo with those authors.

Stay tuned.

> *Electric Plants Point Location: Point layer with electric power plants. Each is a facility with one or more units which generate electricity. The plants are primarily those facilities which utilize natural gas or oil as a fuel for one or more of the steam or gas turbine generators. The business table contains information on the plant and of the capacities of the individual units.*
