Subject: Review of Chapter 2"s
Date: Friday, March 27, 2015 9:11:49 AM

Good morning!

It would appear that confusion abounds within and between our agencies as to the purpose and expectations for the chapter 2 reviews. We have pulled together some internal guidance for review based on standard language templates and NPT decisions. That was intended as a general overview while also allowing for local issue reviews. Admittedly, that guidance has caused some confusion both internally and externally with some of your offices expressing surprise, and some asking us for our guidance so they know what to address.

The feedback we have received to date from your field offices about what they expect when providing our field offices with chapter 2s has been mixed - ranging from very specific review guidance and format to questioning why we were reviewing the chapter at all.

So I am turning to you gurus for guidance and clarification of expectations for Chapter 2. Please advise what feedback, if any, you are expecting from our field offices when we are provided hard copies of the Chapter 2s. We want to ensure we are providing the most useful information for your consideration as quickly as possible.

Thanks for the help!

Pat
