---

Noreen,

Lara very kindly and quickly produced the maps we discussed earlier. Note she used both the original data set we received from BLM as well as the recent data set; both show what we previously advised folks: the stronghold consists almost exclusively of PH, which is precisely why we identified as a stronghold. Please let us know if you need anything further on this, and I'll have a set of hard copies handy as necessary for SGTF.

Much obliged to Lara for the short turnaround and great work.

Matt

Hi Matt,

Here are the maps we discussed showing BLM habitat types within our stronghold areas in Idaho based on the original BLM habitat data (October), as well as habitat data received March, 2015.

Let me know if you need anything else.

Lara
