I believe that Jim Lindstrom has them because he was overlaying them with the rankings. If not then I will do some more looking, but it will have to wait for a few days since I am leaving for meetings in a few minutes.

Subject: Garton Population Delineations

Hi Mike:

Would you happen to have a shapefile of the Garton et al. 2011 population delineation? I was going to conduct a brief GIS analysis of the amount of sagebrush habitats burned in the Southern and Northern Great Basin population areas as well as an assessment regarding the amount of mining claims within these areas as partial justification for our threat rankings.

Thanks,

Shawn Espinosa
