Hey Theresa –

Crazy couple of weeks; sorry I did not get this to you last week after you asked about it. See Pat's message below – I think it is what you are after. I did get your email earlier today – no worries on the follow-up from Stephanie, I appreciate you keeping in the loop on this.

I hope the rest of your week goes smoothly. Cheers,

J-

Hey Jeff -

attached is a copy of the core area strategy itself. It outlines the DDCT in Appendix B - hopefully that will help clear up the confusion.

Lief, Pat –

Any ideas? Theresa is on staff for the OR Governor's office as they try to wrap up the first draft of the Oregon plan….we work pretty closely together on disturbance, mitigation, etc.

Thanks in advance – hope your Friday is starting smoothly.

Cheers

Hi Jeff,

I am looking for information on the Wyoming priority areas approach. I am under the impression that this is different than the DDCT methods. If this is the case, can you advise me on the best place to find information about what it is, how the areas are determined, and what the rationale and assumptions are behind it?

Thanks!
Theresa
