Morning Kevin (hi Drue) and Happy Friday,

Just checking to see that you got these and they are what you needed?

Also, I plan to have some draft tables for you this afternoon of the oil and gas exposure results.

Attached is the updated Current Range data. The zip file contains the entire range data set and a layer for each MZ. This data reflects the changes from the distribution model data and WY updated current range data from WYGFD. The WYGFD resulted in changes that affect MZ 1 and 2.

I've also updated the Metadata to reflect these changes. If you need anything more on this please let me know.

Kevin,

I got this email from Jim after I sent you mine. I am going to wait until I get the final data from Jim, and re-clip. That way, everything will be synchronized. Once that is done, I will upload .img files to ScienceBase for you and let you know.
