Hi Mary!

I've been checking on the Google Form (which- everyone used, how delightful is that?) I believe that you should have access to all the parties identified for each team. If there's someone else you need, we can work on tasking additional folks as necessary.

Data Call

- Mary Grim, LEAD
- Lynn Gemlo - in
- Amy Nicholas - in, but only 50% of time on sage-grouse
- Lief Wiechman -in

Species Report, Outline

- Mary Grim, LEAD
- Craig Hansen - in (and totally excited)
- Amy Nicholas - in, but only 50%
- Kate Norman - in, but sometimes a little nutty. I'd like to be a bit involved with this, if that's cool.

I'm expecting that you'll want to engage Pat, Jesse, Lief, and Dawn (R1 Lief) for some of the review of the outline, but - if reasonable- perhaps they won't be essential for all meetings...?

I was planning to send a "Thanks for your response" email tomorrow afternoon (since I'm still waiting on two folks for the Geographic Areas (SPR) group; I thought I'd take that opportunity to introduce you and Craig as the respective team leads. Then, I'll very gladly leave the rest to you :)

Thanks!
K
