Kate,

I kept the animation on slide 3 but removed elsewhere to allow me to discuss content in a different order. (also, the big arrow on slide 9 startled me 8-))

On slide 8, I'm wondering if you see a reason not to use 'sagebrush habitats' or 'sagebrush associated habitats'. Seems that 'sagebrush' should be mentioned here somewhere.

Also, revised slide 5 per Sarah's edits.

Also, revised slide 11: reordered and included time for the workshop. Ok?

Talk with you tomorrow.
Dave

An additional comment is that "Potential SPR" is really a part of the modeling (slide 3) so I would eliminate it - but I realize some of the RDs may not realize that or think about it like that, so leave it if you feel necessary.

Also, see the couple super picky things that I'd put on Slide 5.

And I think Dave and I reached some consensus on Slide 8 - change: Climate Change to "Future Temporal Changes (due to climate change, energy development, etc.)."

Sarah

Here are my attempts to address these changes.

With regard to Species Needs... Does the current version pretty much cover the species needs? Or is there something else we'd want to include (e.g. genetic diversity)?

Thanks,
K

Sarah,

On slide 8, climate change could affect threats (e.g., fire frequency) directly or habitat (e.g., increased summer precip changing veg community). Also, climate change is in the minds of the DMs as an elevated issue for various reasons. The rational for Aldridge's Powell Center proposal is to evaluate the extent that the conservation plans have taken climate change into account. I think if we did not have climate change explicit identified in the influence diagram, it would stand out as an omission.

Also, on slide 8, how about we revise to read "Sagebrush habitat (quantity, quality, and connectivity)"?

Here's the revised presentation for tomorrow.

I've also posted it to SharePoint just for reference :)

Greater Sage-Grouse

2015 Status Review

Structured Decision Making & Modeling

Regional Director Briefing

May 7, 2014

GOALS FOR TODAY:

Structured Decision Making

- General Benefits
- Specific application to Greater Sage-Grouse
  - Context
  - Modeling
  - Decision Making

ID Geographic Areas
(Spring 2014)
- Potential DPS
- Potential SPR

Analysis and Evaluation
- Predictive Modeling
- PECE Analysis
- Species Report

Extinction risk

Risk Tolerance
- Informed by Policy

Status Determination
(April 2015)
- Status
- Listable Entities

End. → Critical Habitat

Threat. → Critical Habitat

Threat. → 4d (possible)

Threat. → **Not Warranted**

ID Geographic Areas
(Spring 2014)
- Potential DPS
- Potential SPR

Analysis and Evaluation
- Predictive Modeling
- PECE Analysis
- Species Report

Extinction risk

Risk Tolerance
- Informed by Policy

Status Determination
(April 2015)
- Status
- Listable Entities

End.

Threat.

Critical Habitat

4d (possible)

Not Warranted

Objectives

- **FUNDAMENTAL:**
  - Long-term persistence of greater sage-grouse consistent with the ESA
- **PROCESS:**
  - Maximize scientific soundness
  - Efficient and transparent process
  - A clear rationale for decision making that maximizes legal defensibility
- **STRATEGIC:**
  - Maintain relationships with partners

Performance Measures (response variables)

- **Resilience of population**
  - Abundance
- **Redundancy at landscape scale**
  - Distribution
- **Representation (measure of adaptive capacity)**
  - Genetic Diversity
  - Geographic Diversity

ID Geographic Areas

(Spring 2014)

- Potential DPS
- Potential SPR

Analysis and Evaluation

- Predictive Modeling
- PECE Analysis
- Species Report

Extinction risk

Risk Tolerance

- Informed by Policy

Status Determination

(April 2015)

- Status
- Listable Entities

End.

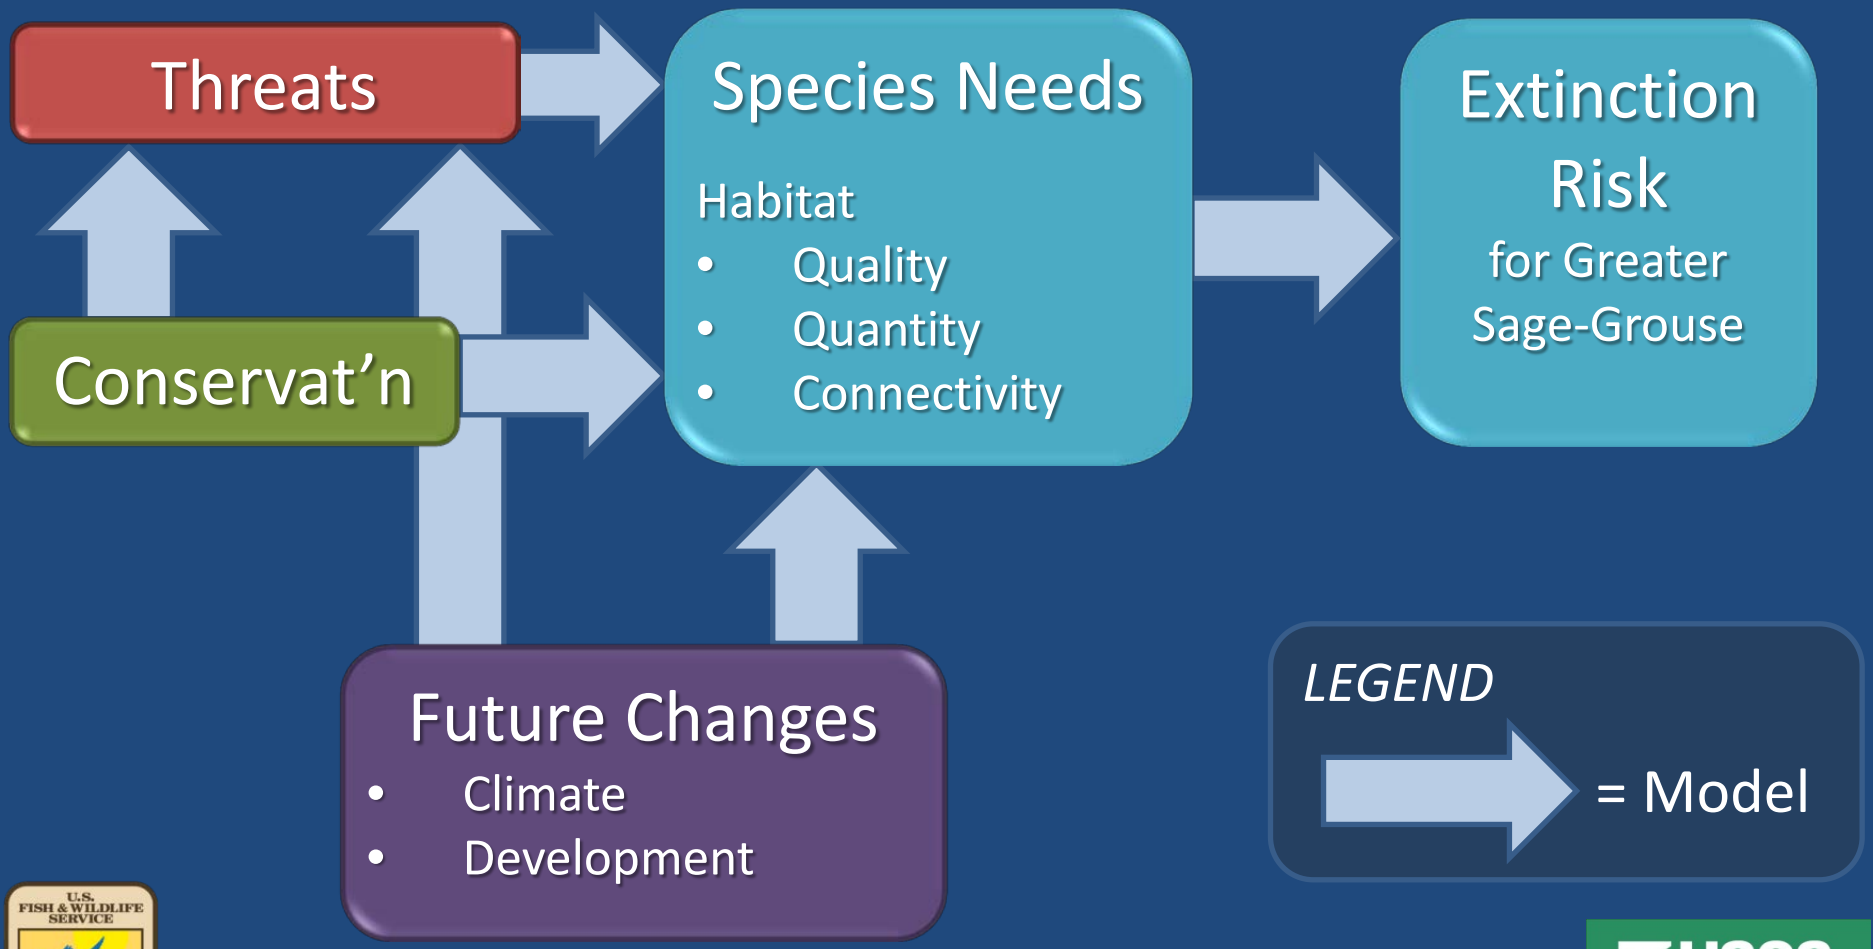
Threat.

Critical Habitat

4d (possible)

Not Warranted

Predictive Modeling



Predictive Modeling

June 2014

Model Building Workshop

July 2014

Expert Review of Model

August 2014

Expert Elicitation

Fall 2014, Winter 2015

Completing Models

ID Geographic Areas

(Spring 2014)

- Potential DPS
- Potential SPR

Analysis and Evaluation

- Predictive Modeling
- PECE Analysis
- Species Report

Extinction risk

Risk Tolerance

- Informed by Policy

Status Determination

(April 2015)

- Status
- Listable Entities

End.

Threat.

Critical Habitat

4d (possible)

Not Warranted

Decision Making

- Facilitated Workshop with the Decision Makers
- Review of Information
  - Model Predictions
  - Evaluation of Uncertainty
- Multiple Day Workshop in Spring 2015

RD Input:

Is the approach acceptable?

Can we proceed with the modeling workshop?
