hello Sue, No bother at all I am thankful that you all are helping with the GRSG funding for the GIS efforts.

I just wanted to make sure I was giving you enough information.

I will continue to add to that file and just send it end of each month.

Thanks again for all your help, Ed

changing. I do a lot of building data, then scraping data (cleaning up), then building again based on new thoughts and updating maps / numbers. We are getting close to having data for some of the threats I'm working on, but there is talk of rebuilding Mining specific data and the GIS Team Lead estimated that could take anywhere from a week to a month of my time. Hope to know more on that soon. In the meantime I'm working on Infrastructure threats, wild horse threats, awaiting modeling for agriculture work, looking at building drought data (stuff will be very time consuming and not sure the plan yet), and I have a ton of FCC data to build as FCC is no longer taking on that task. The draft effort for the Urban lands is complete till we start with changes and updates. There is a meeting next week and that could have me working on that again soon.

I can give more detail if needed, but the spreadsheet is just a quick list of some of the threats each day.

Hope this helps and please let me know if you need something different.

Thanks, Ed
