Ok – I bet it's nice to be out of the fray. What I had in mind was a question about an entry you made I think for PFW in ND. Since you will have limited availability, let's try to deal with the questions via email.

You were listed as the contact for 3 restoration actions I (for the ag conversion threat). Here are my questions:

- The dates of when the work occurred (started and completed) were confusing for entries 7394 (146 ac site) and 7475 (103 ac site).

- When did monitoring occur and did you upload monitoring reports? (the downloads for the supporting documentation in the CED weren't working so I'm trying to sort that problem out today – but in case that doesn't get resolved, I wanted to get you thoughts).

- Who conducted the monitoring and what metrics of success were used to determine the conclusions posted in the CED for each of the 3 sites? When were the sites last visited?

If you are not the best one to answer these questions then hopefully you can direct me to someone else. Thanks Kathy and hope you get back on your feet soon. k

Hi Kevin, I've phased out out of CED and I'm back to PFW full time. Lief Wiechman and Holly Friefeld are the CED leads now. If you have questions on how we developed the system, reached out to partners for data, or PFW data I'm happy to talk with you. I'm fighting a cold so may be hard to reach, but will be checking messages.
