Red Flag Warnings

Red Flag warnings are in effect for southwestern Idaho, southern Oregon and northern California.

Weather Discussion

Scattered thunderstorms will develop over most of the Interior West covering the central and southern Rockies, the Great Basin, northern California and southern Oregon. Most thunderstorms will produce rain with lighter amounts in California and Oregon. Isolated thunderstorms will also form over the far Northwest and the northern Rockies. East of the Rockies, thunderstorms will form along a decaying front from Texas to New England. Some storms could produce heavy rains and flooding. Temperatures will cool across most of West with hot conditions remaining in the Southwest deserts and in the Columbia Basin. Warm and humid conditions will persist in the Southeast while cooler weather spreads through the Plains, the Midwest and New England. In Alaska, scattered rain and thunderstorms will form along the Brooks Range while showers and few thunderstorms move across the southern third of the state. Temperatures will cool over most of the state.
