I'm confused about the review process for the Chapter 2s. If Nicole and I will be spending a week in DC doing consistency reviews, do we need the FWOs to review them for this purpose also?

I'm not saying that the FWOs shouldn't look at the chapters, I'm just wondering if they need to prepare comments that would require surnames. Might be more helpful for them to provide input for Nicole and I to use during our reviews.

Are we implementing the standard review process? Alternatively since this will primarily be a consistency review using our internal guideline should we only flag those that are significantly inconsistent?,
