One of their primary concerns deals with GRSG conservation and the impending listing decision. They asked several questions regarding timelines and policy details and I gave Stephanie Seay your contact info. I know you are more qualified to answer those questions.

meet with the Prairie Pothole Joint Venture on March 25 in support of an encroachment management plan in development for Malmstrom AFB.
My company, Marstel-Day LLC, is completing a study for Malmstrom AFB on behalf of Headquarters United States Air Force called an “Installation Complex Encroachment Management Action Plan” (ICEMAP).
We are interested in gaining a more in-depth understanding of the areas of shared interest between Malmstrom AFB and the surrounding region especially as they pertain to conservation opportunities and potential encroachment concerns in relation to the installation, its missile complex, and associated missions.
The project team will be in Great Falls March 25 and would like to schedule a meeting with you on that day at 4:30 p.m. at your location. If you could please confirm with me that time and date work with your schedule, or offer alternative times on March 25, it would be greatly appreciated. Your insights are essential to the development of a comprehensive and actionable plan for the base. Should you have any questions, please feel free to call me at 540-395-7159.
A summary about the ICEMAP, a memo from our Air Force Program Manager, and
a letter from the Malmstrom AFB Wing Commander are attached for your reference.
We look forward to speaking with you. Thank you for your time.
Respectfully,
Stephanie Seay
