Great! I just wanted to be sure they're involved and informed. Sounds like you've got it covered.

Thanks,
Nick

I have already been in conversations with Terry Messmer, Todd Black and the last PhD student on Parker, Michael Guttery. Dave Dahlgren in now in Kansas.

I also plan on touching base with the local DWR biologist.

Thanks for the suggestion!

Hi Renee,

I was thinking maybe Todd Black or someone else from PARM/USU Extension (David Dahlgren?) should attend the mitigation meeting for sage-grouse. Wouldn't we likely funnel some of the funding for specific projects/initiatives through them? Just wondering your thoughts on the matter.

Thanks,
Nick
