Subject: Re: Paragraph and Line Item Description for FIAT Cheatgrass Prioritization?
Date: Monday, March 16, 2015 4:49:05 PM

Hi Dawn,

This is the paragraph which is under 4.1.4 Proactive Strategies

At the time of document preparation, spatial data were not available which portrayed the distribution of non-native, invasive, and/or noxious plant species across the range of GRSG. Therefore, non-native, invasive, and/or noxious plant species need to be inventoried and monitored in each PPA in order to prioritize treatments of these species. Management actions needed in PPAs include: locating infestations, decreasing propagule pressure (especially along roadside areas), treating satellite infestations, and preventing future infestations.

This is what is the language inserted in every PPA as a project line item.

Under 1st order priority

(Insert PPA Name) Non-Native Treatment: Inventory, treat, and monitor nonnative, invasive species in the PPA.

Let me know if you have any questions.

Cheers,

Sarah

I want to ensure that the language is included in all step-down assessments so we have consistency across the planning area.
