Looking at what I sent you and think one enhancement to the map would be to drill down to a finer scale north of CMR NWR to more clearly display the matrix of SLO there. That, and come up with a different color scheme that shows habitat status without eclipsing SLO.

Good speaking earlier. Sorry I was rushed; 2Big2Fail.

I asked Pat for a map and she had Jim Lindstrom/WY ES, cook one up. Per our conversation, I specified the map include PACs, habitat status, and land ownership. Let me know if this fits the bill, if you need more features/data, or a different format to get you started. Cheers.
