FYI: I advised Seth we will share the final product with him via our website at 1200 MDT, once we've distributed it to state and federal partners here at SGTF. Thanks.

> Matt I hope this email finds you well and in better condition than when we last met. Do either of you have an update on the deliverables (I think it was a version of Angela Burgess' CCAA/WLFW doc) from the CCAA/WLFW earlier in the month in Lakewood? Tim is on spring break, I hadn't heard anything since the meeting. A JV partner in WA state is looking for info regarding CCAA and WLFW to add to the WA State CCAA being developed by Washington Department of Fish and Game... I was thinking using the most up to date versions of things would be best. I have some other WLFW documents that should suffice for the time being if need be. (Galon the docs. I have that seem best suited is the NB from Chief Weller from 12-2013,including the said attachments - see attached NB)
