>> The video I worked on was always meant to just be shown off to the side on a loop and people would just kinda walk by and watch it for a minute as they were mingling or whatever. It wasn't meant to be part of a presentation or anything like that.
>>
>> When the event was going to be at the Zoo a few weeks ago, we had arranged to have a large, flat-panel monitor on a cart set up and were going to have the video playing on that. Not sure if you'll have that at your disposal. You can display it via a projector, but depending on the amount of ambient light in the room, the picture could get washed out.
>>
>> I need to upload the video to Drive. It'll take a while, so I'll likely have it uploaded and share with you by tomorrow morning.

Thanks Pat!

That's a good suggestion about the DVD player vs/ Powerpoint. I thought that I would show them on a DVD player but if I can hook up a laptop and show it through powerpoint, that might be a better way-- do you have a recommended way to display them?

I have a couple edits to make to the Map video, but should have that for you by the end of the day tomorrow.

I'm not sure how you plan to show the videos. Were you thinking of playing them in a DVD player? Otherwise, I might suggest they be in back-to-back PowerPoint slides if you want them to play one after the other.

I will share the current video with you in Google Drive, so you can see what it looks like. I need to make some color and text changes, then it should be good to go.

Hi Pat,

Elizabeth mentioned you made an awesome video for the CCAA event this Friday. Any chance I can get a copy of it on a disc or thumb drive? I'm planning to head to Bend on Wednesday afternoon and would like to run through the program on Thursday, including showing the video.

We also plan to show the Harney Co, video during the event too-- not sure if there is a way to have both videos on one disc,

thanks!
Anna
