Carol,

Revisions look fine and I think it captures my comments - thanks!

Hi Carol,

Just a few additional comments. I had hoped to get some additional input from our Science Applications folks but didn't receive any additional feedback.

Thanks for pulling this together!

We're coming down to the wire. Thanks everyone for your input to this last draft. I think this version is getting much stronger and clearer.

I hope you can find a bit more time to review this version. You can share this version with selected others within your agency, but please keep this pretty narrow. I do not want to pre-empt the Department on the input they will provide us which could lead to significant changes, nor what they will send out for a full review of the complete document. All agencies will get opportunities for a full review of the document.

Please get your comments back to me by **March 17**. For those folks that are getting a couple other reviews from your agency, I would appreciate them back in one document in track changes. Thanks to all of you to continuing to stay engaged. Talk to you tomorrow.

Carol
