Subject:	Re: GRSG: BLM ADPP and No-Action spatial data received
Date:	Tuesday, March 24, 2015 12:26:49 PM

Jesse,

I like this approach and I'm wondering if I shouldn't duplicate the tables for the calculations we've asked for in that list I sent out last week.

Additionally, does the group have any comments/edits/adds to the list I sent out last Thursday? I've got the GIS Team meeting tomorrow morning, and it'd be good to begin giving them some direction.

> Lief, Dawn, and I discussed next steps for this data and I volunteered to mock up some tables that we would need filled in for our analysis. I've attached a spreadsheet that captures that effort. Basically, I just took the maps that BLM produced for the Federal Family meetings and assumed that the allocation categories hadn't changed (e.g., open, closed, avoidance, etc.). The jist of these tables is that we need acres and percentages by MZ, separated by within PAC and outside PAC - for both the no action and the final allocative decision. We also need to know what the acres and percentages are for range, distribution, and numbers (which I've separated by tabs in the spreadsheet). Range and distribution are pretty straightforward (assuming we can give the GIS team a binary map of each). Numbers is a bit more complicated. Kevin - we'll need your advice on the best way to approach this.

afternoon.

With a quick review, I'd say it looks complete to me, and the data loads into ArcGIS. I'm attaching here the delivery memo and list of datasets .PDFs for you.

I've put the data up on ScienceBase,
here: https://www.sciencebase.gov/catalog/folder/550c909be4b02e76d759d771

Thanks,
Lara
