Yes, that is correct Kevin.

So per Lara's email we cannot split already lumped data in the attribute tables. We were advised by the BLM to look at the EIS's to get definitions when we saw there was basically no metadata for the category classes. Lara please correct me if I am misspoken.

Hi Pat,

Sorry I'm just now getting back to you. Hope this helps:

1. Major Constraint: NSOs, density and disturbance restrictions and multiple overlapping timing constraints or controlled surface uses.
2. Are NSOs major constraints: yes
3. Minor Constraints: single (non-overlapping) timing constraints or CSUs.

On Wed, Mar 25, 2015 at 3:52 PM, Deibert, Pat <pat_deibert@fws.gov> wrote:
