Date:	Thursday, March 19, 2015 11:07:55 AM

I would say for stuff like this (SMA layers) where there's a better/best resolution - you (GIS Team) make a recommendation and keep me (or myself and Pat) in the loop and we'll object (read: ask for clarification) if there's an unexpected red flag.

For other layer decisions that aren't as cut and dried (disturbance layers(?) - struggling for a good example), follow the same approach (make a recommendation), but allow for some discussion between the GIS Team and SLT.

In closing, just keep ccing myself (and Pat) so we can continue catching up and staying in the loop. We'll communicate with the rest of the SLT as appropriate.

Hope that helps,

LW
