---

Hello Ron, Here are the mining numbers for the general minerals based on the following data combined as a general mining dataset in relation to the management Zones.

Here are the actual data used in the overlay analysis. Will write it all up soon.

Energy Non-renewable: BLM Mining (No update available, 10/24/14 email FQ)
Mineral Material Disposal Sites and Locatable Mining Claims (from USGS OFR 2013-1098

BLM Minerals & Prospecting Permit Applications - Non-energy **Minerals & Prospecting Permit Applications** (from USGS OFR 2013-1098

Energy Non-renewable: **Footprints of all of the non-coal producing mines**

Mining: Quarries, Strip Mines and Gravel Pits - extraction from the LANDFIRE EVT v1.2

Table to use in your report has the Bi-State values dropped.

Use table named "Mining_MgntZ_Acres_NoBiState_Values.xls"

Note: I am sending you a table that will have just numbers for the Bi_State area should you ever need it. Named " Mining_MgntZ_Acres_BiState_Values.xls"

***** Also Jim checked and **our maps should show the Bi-State population areas** (no threat data in those areas). On our maps they are the same tan color. I will delete the bad maps on my end that do not show the Bi-State areas. Please do so on your side too and only use the ones I sent showing those areas along with all other populations.

Thanks hope this helps, Ed
