>> On slide 8, climate change could affect threats (e.g., fire frequency) directly or habitat (e.g., increased summer precip changing veg community). Also, climate change is in the minds of the DMs as an elevated issue for various reasons. The rational for Aldridge's Powell Center proposal is to evaluate the extent that the conservation plans have taken climate change into account. I think if we did not have climate change explicit identified in the influence diagram, it would stand out as an omission.
>>
>> Also, on slide 8, how about we revise to read "Sagebrush habitat (quantity, quality, and connectivity)"?

Hi Kate and Dave, thanks so much for putting this together. My comments are embedded. Let me know what questions you have.

Thanks,
Sarah

Here's the revised presentation for tomorrow.

I've also posted it to SharePoint just for reference :)
