Jeffrey	Shivar	IL	IL	60402	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Human-caused mortality of grizzly bears has been on the rise, and the Yellowstone population ha surrounding states to manage these bears and permit trophy hunting will add significant pressure to this population. As you know, this population also remains severely isolated and states do not have regulations in place to protect bears that could connect with bears outside an arbitrary boundary are likely to be killed. - - Asking for comments on this proposal is premature because state regulations for bears aren't in place, so it's impossible to determine how bears will be managed once federal protections are removed. Please reco Yellowstone bears on the endangered species list. - - Sincerely,
David	Beck	Warren	NJ	7059	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. As you know, this population also remains severely isolated and states do not have regulations in place to protect bears that could connect with bears outside an arbitrary boundary are likely to be killed. Have we forgotten what has been happening to the bison in the park for the last 30 years! Cattle ranchers get to graze on public land for damn near free, and all the public gets out of it is an annual, blood-soaked sla become our National Animal(I realize that the National Park was trying to work out something with the surrounding states to allow animals that wandered outside of park boundaries, not to be automatically shot dead, but I don't know if there has been a final resolutio is premature because state regulations for bears aren't in place, so it's impossible to determine how bears will be managed once federal protections are removed. You gotta have this worked out prior to, not after the fact. Why is the U.S. Fish & Wildlife Service in such they completely recovered thorughout their historic range? I'd have to say NO, especially since there are states that are currently trying to develop plans to increase grizzly bear numbers (Oregon). It would appear to me that the U.S. Fish & Wildlife Service is giving too and too little to what the rest of us Americans want. Hey, we provide income in the form of tourism dollars. We go to Yellowstone to see the wildlife and the natural wonders of the park; we don't want to go visit one of most impressive National Parks, just to see a lot their parks protected from hunters; we value live animals way more than dead ones. And, we resent that some hunters in this country seem to be out to exterminate the wildlife in our National Parks, as well as, on our public lands! Please reconsider this delisting prop endangered species list. - - Sincerely,

Andrea	Hagemeier-Gilga	Essen	ot	45259	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Human-caused mortality of grizzly bears has been on the rise, and the Yellowstone population ha surrounding states to manage these bears and permit trophy hunting will add significant pressure to this population. As you know, this population also remains severely isolated and states do not have regulations in place to protect bears that could connect with bears outside an arbitrary boundary are likely to be killed. - - Asking for comments on this proposal is premature because state regulations for bears aren't in place, so it's impossible to determine how bears will be managed once federal protections are removed. Please reco Yellowstone bears on the endangered species list. - - Sincerely,

Judith	Shardo	Mercer Island	WA	98040	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Human-caused mortality of grizzly bears has been on the rise, and the Yellowstone population ha surrounding states to manage these bears and permit trophy hunting will add significant pressure to this population. As you know, this population also remains severely isolated and states do not have regulations in place to protect bears that could connect with bears outside an arbitrary boundary are likely to be killed. - - Asking for comments on this proposal is premature because state regulations for bears aren't in place, so it's impossible to determine how bears will be managed once federal protections are removed. Please reco Yellowstone bears on the endangered species list. - - Sincerely,

Please reco Yellowstone bears on the endangered species list. - - Sincerely,
Ellen	Dollar	San Luis Obispo	CA	93401	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Human-caused mortality of grizzly bears has been on the rise, and the Yellowstone population ha surrounding states to manage these bears and permit trophy hunting will add significant pressure to this population. As you know, this population also remains severely isolated and states do not have regulations in place to protect bears that could connect with bears outside an arbitrary boundary are likely to be killed. - - Asking for comments on this proposal is premature because state regulations for bears aren't in place, so it's impossible to determine how bears will be managed once federal protections are removed. Please reco Yellowstone bears on the endangered species list. - - Sincerely,
Rachel	Wahlberg	Novato	CA	94945	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Ann	Waller	Chicago	IL	60646	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Human-caused mortality of grizzly bears has been on the rise, and the Yellowstone population ha surrounding states to manage these bears and permit trophy hunting will add significant pressure to this population. As you know, this population also remains severely isolated and states do not have regulations in place to protect bears that could connect with bears outside an arbitrary boundary are likely to be killed. - - Asking for comments on this proposal is premature because state regulations for bears aren't in place, so it's impossible to determine how bears will be managed once federal protections are removed. Please reco Yellowstone bears on the endangered species list. - - Sincerely,

Lauren	Ranz	Lafayette	CA	94549	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Human-caused mortality of grizzly bears has been on the rise, and the Yellowstone population ha surrounding states to manage these bears and permit trophy hunting will add significant pressure to this population. As you know, this population also remains severely isolated and states do not have regulations in place to protect bears that could connect with bears outside an arbitrary boundary are likely to be killed. - - Asking for comments on this proposal is premature because state regulations for bears aren't in place, so it's impossible to determine how bears will be managed once federal protections are removed. Please reco Yellowstone bears on the endangered species list. - - Sincerely,

jennifer	Jelinek	janesville	WI	53545	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Human-caused mortality of grizzly bears has been on the rise, and the Yellowstone population ha surrounding states to manage these bears and permit trophy hunting will add significant pressure to this population. As you know, this population also remains severely isolated and states do not have regulations in place to protect bears that could connect with bears outside an arbitrary boundary are likely to be killed. - - Asking for comments on this proposal is premature because state regulations for bears aren't in place, so it's impossible to determine how bears will be managed once federal protections are removed. Please reco Yellowstone bears on the endangered species list. - - Sincerely,
Patrice	Green	Parkton	MD	21120	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Douglas	Gruenau	Santa Fe	NM	87508	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Human-caused mortality of grizzly bears has been on the rise, and the Yellowstone population ha understand how a climate that is changing will affect the bear population in this area. Allowing the surrounding states to manage these bears and permit trophy hunting will add significant pressure to this population. As you know, this population also remains severely place to protect bears that could connect with bears in other areas. Instead, those that wander outside an arbitrary boundary are likely to be killed. - - Asking for comments on this proposal is premature because state regulations for bears aren't in place, so it's impossi once federal protections are removed. Please reconsider this delisting proposal and keep Yellowstone bears on the endangered species list. This is an iconic animal in the American landscape, now limited to very small areas of its former range. - - Sincerely,

Please reco Yellowstone bears on the endangered species list. - - Sincerely,
S.	Robertson	Shrewsbury	MA	1545	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Human-caused mortality of grizzly bears has been on the rise, and the Yellowstone population ha surrounding states to manage these bears and permit trophy hunting will add significant pressure to this population. As you know, this population also remains severely isolated and states do not have regulations in place to protect bears that could connect with bears outside an arbitrary boundary are likely to be killed. - - Asking for comments on this proposal is premature because state regulations for bears aren't in place, so it's impossible to determine how bears will be managed once federal protections are removed. Please reco Yellowstone bears on the endangered species list. - - Sincerely,

Please reco Yellowstone bears on the endangered species list. - - Sincerely,
Maureen	Powers	AK	AK	99603	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Human-caused mortality of grizzly bears has been on the rise, and the Yellowstone population ha surrounding states to manage these bears and permit trophy hunting will add significant pressure to this population. As you know, this population also remains severely isolated and states do not have regulations in place to protect bears that could connect with bears outside an arbitrary boundary are likely to be killed. - - Asking for comments on this proposal is premature because state regulations for bears aren't in place, so it's impossible to determine how bears will be managed once federal protections are removed. Please reco Yellowstone bears on the endangered species list. - - Sincerely,

Ann	Eppler	Lincoln	NE	68516	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Human-caused mortality of grizzly bears has been on the rise, and the Yellowstone population ha surrounding states to manage these bears and permit trophy hunting will add significant pressure to this population. As you know, this population also remains severely isolated and states do not have regulations in place to protect bears that could connect with bears outside an arbitrary boundary are likely to be killed. - - Asking for comments on this proposal is premature because state regulations for bears aren't in place, so it's impossible to determine how bears will be managed once federal protections are removed. Please reco Yellowstone bears on the endangered species list. - - Sincerely,

PAMELA	LEACH	BENONI	ot	1501	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Human-caused mortality of grizzly bears has been on the rise, and the Yellowstone population ha surrounding states to manage these bears and permit trophy hunting will add significant pressure to this population. As you know, this population also remains severely isolated and states do not have regulations in place to protect bears that could connect with bears outside an arbitrary boundary are likely to be killed. - - Asking for comments on this proposal is premature because state regulations for bears aren't in place, so it's impossible to determine how bears will be managed once federal protections are removed. Please reco Yellowstone bears on the endangered species list. - - Sincerely,

BECKY	bunnell	Vermont	VT	5905	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Human-caused mortality of grizzly bears has been on the rise, and the Yellowstone population ha surrounding states to manage these bears and permit trophy hunting will add significant pressure to this population. As you know, this population also remains severely isolated and states do not have regulations in place to protect bears that could connect with bears outside an arbitrary boundary are likely to be killed. - - Asking for comments on this proposal is premature because state regulations for bears aren't in place, so it's impossible to determine how bears will be managed once federal protections are removed. Please reco Yellowstone bears on the endangered species list. - - Sincerely,

Howard	Higson	Sebastopol	CA	95472	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Human-caused mortality of grizzly bears has been on the rise, and the Yellowstone population ha surrounding states to manage these bears and permit trophy hunting will add significant pressure to this population. As you know, this population also remains severely isolated and states do not have regulations in place to protect bears that could connect with bears outside an arbitrary boundary are likely to be killed. - - Asking for comments on this proposal is premature because state regulations for bears aren't in place, so it's impossible to determine how bears will be managed once federal protections are removed. Please reco Yellowstone bears on the endangered species list. - - Sincerely,

Rose Ann	Kaiser	Huntington	IN	46750	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Human-caused mortality of grizzly bears has been on the rise, and the Yellowstone population ha surrounding states to manage these bears and permit trophy hunting will add significant pressure to this population. As you know, this population also remains severely isolated and states do not have regulations in place to protect bears that could connect with bears outside an arbitrary boundary are likely to be killed. - - Asking for comments on this proposal is premature because state regulations for bears aren't in place, so it's impossible to determine how bears will be managed once federal protections are removed. Please reco Yellowstone bears on the endangered species list. - - Sincerely,
Angie	Bahris	Santa Monica	CA	90405	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Human-caused mortality of grizzly bears has been on the rise, and the Yellowstone population ha surrounding states to manage these bears and permit trophy hunting will add significant pressure to this declining population. As you know, this population also remains severely isolated and states do not have regulations in place to protect bears that could connect w wander outside an arbitrary boundary are likely to be killed. - - Asking for comments on this proposal is premature because state regulations for bears aren't in place, so it's impossible to determine how bears will be managed once federal protections are removed. Ple keep Yellowstone bears on the endangered species list. - - Sincerely,

Please reco Yellowstone bears on the endangered species list. - - Sincerely,
Randi	Lorah	Mechanicsburg	PA	17050	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Human-caused mortality of grizzly bears has been on the rise, and the Yellowstone population ha surrounding states to manage these bears and permit trophy hunting will add significant pressure to this population. As you know, this population also remains severely isolated and states do not have regulations in place to protect bears that could connect with bears outside an arbitrary boundary are likely to be killed. - - Asking for comments on this proposal is premature because state regulations for bears aren't in place, so it's impossible to determine how bears will be managed once federal protections are removed. Please reco Yellowstone bears on the endangered species list. - - Sincerely,

Donna	Malvin	Williamsburg	VA	23185	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Human-caused mortality of grizzly bears has been on the rise, and the Yellowstone population ha surrounding states to manage these bears and permit trophy hunting will add significant pressure to this population. As you know, this population also remains severely isolated and states do not have regulations in place to protect bears that could connect with bears outside an arbitrary boundary are likely to be killed. - - Asking for comments on this proposal is premature because state regulations for bears aren't in place, so it's impossible to determine how bears will be managed once federal protections are removed. Please reco Yellowstone bears on the endangered species list. - - Sincerely,

Mariko	Wheeler	AZ	AZ	86001	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Human-caused mortality of grizzly bears has been on the rise, and the Yellowstone population ha surrounding states to manage these bears and permit trophy hunting will add significant pressure to this population. As you know, this population also remains severely isolated and states do not have regulations in place to protect bears that could connect with bears outside an arbitrary boundary are likely to be killed. - - Asking for comments on this proposal is premature because state regulations for bears aren't in place, so it's impossible to determine how bears will be managed once federal protections are removed. Please reco Yellowstone bears on the endangered species list. - - Sincerely,

Jillian	Forschner	Hudson	MA	1749	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Human-caused mortality of grizzly bears has been on the rise, and the Yellowstone population ha surrounding states to manage these bears and permit trophy hunting will add significant pressure to this population. As you know, this population also remains severely isolated and states do not have regulations in place to protect bears that could connect with bears outside an arbitrary boundary are likely to be killed. - - Asking for comments on this proposal is premature because state regulations for bears aren't in place, so it's impossible to determine how bears will be managed once federal protections are removed. Please reco Yellowstone bears on the endangered species list. - - Sincerely,

Hosea	McAdoo	SHERWOOD	AR	72120	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Human-caused mortality of grizzly bears has been on the rise, and the Yellowstone population ha surrounding states to manage these bears and permit trophy hunting will add significant pressure to this population. As you know, this population also remains severely isolated and states do not have regulations in place to protect bears that could connect with bears outside an arbitrary boundary are likely to be killed. - - Asking for comments on this proposal is premature because state regulations for bears aren't in place, so it's impossible to determine how bears will be managed once federal protections are removed. Please reco Yellowstone bears on the endangered species list. - - Sincerely,

Arlene	Mercurio	Pennsylvania	PA	15068	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Human-caused mortality of grizzly bears has been on the rise, and the Yellowstone population ha surrounding states to manage these bears and permit trophy hunting will add significant pressure to this population. As you know, this population also remains severely isolated and states do not have regulations in place to protect bears that could connect with bears outside an arbitrary boundary are likely to be killed. - - Asking for comments on this proposal is premature because state regulations for bears aren't in place, so it's impossible to determine how bears will be managed once federal protections are removed. Please reco Yellowstone bears on the endangered species list. - - Sincerely,

Rebecca	Kraimer	Las Cruces	NM	88011	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Human-caused mortality of grizzly bears has been on the rise, and the Yellowstone population ha surrounding states to manage these bears and permit trophy hunting will add significant pressure to this population. As you know, this population also remains severely isolated and states do not have regulations in place to protect bears that could connect with bears outside an arbitrary boundary are likely to be killed. - - Asking for comments on this proposal is premature because state regulations for bears aren't in place, so it's impossible to determine how bears will be managed once federal protections are removed. Please reco Yellowstone bears on the endangered species list. - - Sincerely,

Jacqueline Sowa	Colyer	East Fallowfield	PA	19320	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Human-caused mortality of grizzly bears has been on the rise, and the Yellowstone population ha surrounding states to manage these bears and permit trophy hunting will add significant pressure to this population. As you know, this population also remains severely isolated and states do not have regulations in place to protect bears that could connect with bears outside an arbitrary boundary are likely to be killed. - - Asking for comments on this proposal is premature because state regulations for bears aren't in place, so it's impossible to determine how bears will be managed once federal protections are removed. Please reco Yellowstone bears on the endangered species list. - - Sincerely,

ann	despont	mendham	NJ	7945	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Human-caused mortality of grizzly bears has been on the rise, and the Yellowstone population ha surrounding states to manage these bears and permit trophy hunting will add significant pressure to this population. As you know, this population also remains severely isolated and states do not have regulations in place to protect bears that could connect with bears outside an arbitrary boundary are likely to be killed. - - Asking for comments on this proposal is premature because state regulations for bears aren't in place, so it's impossible to determine how bears will be managed once federal protections are removed. Please reco Yellowstone bears on the endangered species list. - - Sincerely,

David	Bressler	state college	PA	16801	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Human-caused mortality of grizzly bears has been on the rise, and the Yellowstone population ha surrounding states to manage these bears and permit trophy hunting will add significant pressure to this population. As you know, this population also remains severely isolated and states do not have regulations in place to protect bears that could connect with bears outside an arbitrary boundary are likely to be killed. - - Asking for comments on this proposal is premature because state regulations for bears aren't in place, so it's impossible to determine how bears will be managed once federal protections are removed. Please reco Yellowstone bears on the endangered species list. - - Sincerely,
Carolyn	Haupt	VA	VA	22901	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Mark	Fabry	Eureka	IL	61530	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Human-caused mortality of grizzly bears has been on the rise, and the Yellowstone population ha surrounding states to manage these bears and permit trophy hunting will add significant pressure to this population. As you know, this population also remains severely isolated and states do not have regulations in place to protect bears that could connect with bears outside an arbitrary boundary are likely to be killed. - - Asking for comments on this proposal is premature because state regulations for bears aren't in place, so it's impossible to determine how bears will be managed once federal protections are removed. Please reco Yellowstone bears on the endangered species list. - - Sincerely,
Robert	Haslag	Missouri	MO	65023	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Steven	Yanoff	White Oaks	NM	88301	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Human-caused mortality of grizzly bears has been on the rise, and the Yellowstone population ha surrounding states to manage these bears and permit trophy hunting will add significant pressure to this population. As you know, this population also remains severely isolated and states do not have regulations in place to protect bears that could connect with bears outside an arbitrary boundary are likely to be killed. - - Asking for comments on this proposal is premature because state regulations for bears aren't in place, so it's impossible to determine how bears will be managed once federal protections are removed. Please reco Yellowstone bears on the endangered species list. - - Sincerely,

James	Pruitte	Greenville	SC	29609	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Human-caused mortality of grizzly bears has been on the rise, and the Yellowstone population ha surrounding states to manage these bears and permit trophy hunting will add significant pressure to this population. As you know, this population also remains severely isolated and states do not have regulations in place to protect bears that could connect with bears outside an arbitrary boundary are likely to be killed. - - Asking for comments on this proposal is premature because state regulations for bears aren't in place, so it's impossible to determine how bears will be managed once federal protections are removed. Please reco Yellowstone bears on the endangered species list. - - Sincerely,

Charles	Miller	Choose a State	IL	60061	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Human-caused mortality of grizzly bears has been on the rise, and the Yellowstone population ha surrounding states to manage these bears and permit trophy hunting will add significant pressure to this population. As you know, this population also remains severely isolated and states do not have regulations in place to protect bears that could connect with bears outside an arbitrary boundary are likely to be killed. - - Asking for comments on this proposal is premature because state regulations for bears aren't in place, so it's impossible to determine how bears will be managed once federal protections are removed. Please reco Yellowstone bears on the endangered species list. - - Sincerely,
Kate	Hilts	Massachusetts	MA	2446	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Human-caused mortality of grizzly bears has been on the rise, and the Yellowstone population ha surrounding states to manage these bears and permit trophy hunting will add significant pressure to this population. Daniella	Cat	South Lake Tahoe	CA	96150	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Human-caused mortality of grizzly bears has been on the rise, and the Yellowstone population ha surrounding states to manage these bears and permit trophy hunting will add significant pressure to this population. As you know, this population also remains severely isolated and states do not have regulations in place to protect bears that could connect with bears outside an arbitrary boundary are likely to be killed. - - Asking for comments on this proposal is premature because state regulations for bears aren't in place, so it's impossible to determine how bears will be managed once federal protections are removed. Please reco Yellowstone bears on the endangered species list. - - Sincerely,

As you know, this population also remains severely isolated and states do not have regulations in place to protect bears that could connect with bears outside an arbitrary boundary are likely to be killed. - - Scarface was recently murdered by what may have been a scumbag elk hunter and his body left to rot. There is no justification for allowing the hunting of any predator. Delisting wolves has resulted in the states go same thing will happen to grizzlies. The Fish and wildlife Service already has a reputation as a kiss ass hunter loving organization that doesn't give a damn about wildlife. For once do the right thing and keep grizzlies on the endangered species list. And please ban all hun understand the definition of "refuge," don't you? - - Asking for comments on this proposal is premature because state regulations for bears aren't in place, so it's impossible to determine how bears will be managed once federal protections are removed. Please reconsi Yellowstone bears on the endangered species list. - - Sincerely,

Please reco Yellowstone bears on the endangered species list. - - Sincerely,
Sara	Holmes	Chester	CT	6412	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Human-caused mortality of grizzly bears has been on the rise, and the Yellowstone population ha surrounding states to manage these bears and permit trophy hunting will add significant pressure to this population. As you know, this population also remains severely isolated and states do not have regulations in place to protect bears that could connect with bears outside an arbitrary boundary are likely to be killed. - - Asking for comments on this proposal is premature because state regulations for bears aren't in place, so it's impossible to determine how bears will be managed once federal protections are removed. Please reco Yellowstone bears on the endangered species list. - - Sincerely,

Please reco Yellowstone bears on the endangered species list. - - Sincerely,
Kate	Kenner	Jamaica Plain	MA	2130	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Human-caused mortality of grizzly bears has been on the rise, and the Yellowstone population ha surrounding states to manage these bears and permit trophy hunting will add significant pressure to this population. As you know, this population also remains severely isolated and states do not have regulations in place to protect bears that could connect with bears outside an arbitrary boundary are likely to be killed. - - Asking for comments on this proposal is premature because state regulations for bears aren't in place, so it's impossible to determine how bears will be managed once federal protections are removed. Please reco Yellowstone bears on the endangered species list. - - Sincerely,

Tracy	Doherty	Quincy	MA	2169	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Human-caused mortality of grizzly bears has been on the rise, and the Yellowstone population ha surrounding states to manage these bears and permit trophy hunting will add significant pressure to this population. As you know, this population also remains severely isolated and states do not have regulations in place to protect bears that could connect with bears outside an arbitrary boundary are likely to be killed. - - Asking for comments on this proposal is premature because state regulations for bears aren't in place, so it's impossible to determine how bears will be managed once federal protections are removed. Please reco Yellowstone bears on the endangered species list. - - Sincerely,
Penny	Gregorio	Albany	GA	31721	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Please reco Yellowstone bears on the endangered species list. - - Sincerely,
Sharon	Balzano	Wheat Ridge	CO	80033	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Human-caused mortality of grizzly bears has been on the rise, and the Yellowstone population ha surrounding states to manage these bears and permit trophy hunting will add significant pressure to this population. As you know, this population also remains severely isolated and states do not have regulations in place to protect bears that could connect with bears outside an arbitrary boundary are likely to be killed. - - Asking for comments on this proposal is premature because state regulations for bears aren't in place, so it's impossible to determine how bears will be managed once federal protections are removed. Please reco Yellowstone bears on the endangered species list. - - Sincerely,

Carol	Rahbari	Ypsilanti	MI	48197	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Human-caused mortality of grizzly bears has been on the rise, and the Yellowstone population ha surrounding states to manage these bears and permit trophy hunting will add significant pressure to this population. As you know, this population also remains severely isolated and states do not have regulations in place to protect bears that could connect with bears outside an arbitrary boundary are likely to be killed. - - Asking for comments on this proposal is premature because state regulations for bears aren't in place, so it's impossible to determine how bears will be managed once federal protections are removed. Please reco Yellowstone bears on the endangered species list. - - Sincerely,

Marion W.	Hylton	- Select -	FL	32606	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Human-caused mortality of grizzly bears has been on the rise, and the Yellowstone population ha surrounding states to manage these bears and permit trophy hunting will add significant pressure to this population. As you know, this population also remains severely isolated and states do not have regulations in place to protect bears that could connect with bears outside an arbitrary boundary are likely to be killed. Please give t his matter your urgent attention. - - Asking for comments on this proposal is premature because state regulations for bears aren't in place, so it's impossible to determine how bears will be managed onc reconsider this delisting proposal and keep Yellowstone bears on the endangered species list. - - Sincerely,
Emma	Bradshaw	Lisle	IL	60532	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Rosemary	Caolo	Scranton	PA	18510	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Human-caused mortality of grizzly bears has been on the rise, and the Yellowstone population ha surrounding states to manage these bears and permit trophy hunting will add significant pressure to this population. As you know, this population also remains severely isolated and states do not have regulations in place to protect bears that could connect with bears outside an arbitrary boundary are likely to be killed. - - Asking for comments on this proposal is premature because state regulations for bears aren't in place, so it's impossible to determine how bears will be managed once federal protections are removed. Please reco Yellowstone bears on the endangered species list. - - Sincerely,

Charmain	Devereaux	New York	NY	10075	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Human-caused mortality of grizzly bears has been on the rise, and the Yellowstone population ha surrounding states to manage these bears and permit trophy hunting will add significant pressure to this population. As you know, this population also remains severely isolated and states do not have regulations in place to protect bears that could connect with bears outside an arbitrary boundary are likely to be killed. - - Asking for comments on this proposal is premature because state regulations for bears aren't in place, so it's impossible to determine how bears will be managed once federal protections are removed. Please reco Yellowstone bears on the endangered species list. - - Sincerely,

Colby	Cox	Pompano Beach	FL	33060	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Human-caused mortality of grizzly bears has been on the rise, and the Yellowstone population ha surrounding states to manage these bears and permit trophy hunting will add significant pressure to this population. As you know, this population also remains severely isolated and states do not have regulations in place to protect bears that could connect with bears outside an arbitrary boundary are likely to be killed. - - Asking for comments on this proposal is premature because state regulations for bears aren't in place, so it's impossible to determine how bears will be managed once federal protections are removed. Please reco Yellowstone bears on the endangered species list. - - Sincerely,

Gabriele	Reinhart	Vienna	ot	1230	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Human-caused mortality of grizzly bears has been on the rise, and the Yellowstone population ha surrounding states to manage these bears and permit trophy hunting will add significant pressure to this population. As you know, this population also remains severely isolated and states do not have regulations in place to protect bears that could connect with bears outside an arbitrary boundary are likely to be killed. - - Asking for comments on this proposal is premature because state regulations for bears aren't in place, so it's impossible to determine how bears will be managed once federal protections are removed. Please reco Yellowstone bears on the endangered species list. - - Sincerely,
David	LaVerne	Dickson City	PA	18519	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Human-caused mortality of grizzly bears has been on the rise, and the Yellowstone population ha surrounding states to manage these bears and permit trophy hunting will add significant pressure to this population. As you know, this population also remains severely isolated and states do not have regulations in place to protect bears that could connect with bears outside an arbitrary boundary are likely to be killed. - - Asking for comments on this proposal is premature because state regulations for bears aren't in place, so it's impossible to determine how bears will be managed once federal protections are removed. Please reco Yellowstone bears on the endangered species list. - - Sincerely,
Jeanne	Held-Warmkessel	North Wales	PA	19454	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Human-caused mortality of grizzly bears has been on the rise, and the Yellowstone population ha surrounding states to manage these bears and permit trophy hunting will add significant pressure to this population. As you know, this population also remains severely isolated and states do not have regulations in place to protect bears that could connect with bears outside an arbitrary boundary are likely to be killed. - - Asking for comments on this proposal is premature because state regulations for bears aren't in place, so it's impossible to determine how bears will be managed once federal protections are removed. C.	T.	Lone Tree	CO	80124	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Human-caused mortality of grizzly bears has been on the rise, and the Yellowstone population ha surrounding states to manage these bears and permit trophy hunting will add significant pressure to this population. As you know, this population also remains severely isolated and states do not have regulations in place to protect bears that could connect with bears outside an arbitrary boundary are likely to be killed. - - Asking for comments on this proposal is premature because state regulations for bears aren't in place, so it's impossible to determine how bears will be managed once federal protections are removed. Please reco Yellowstone bears on the endangered species list. - - Sincerely,

Please reco Yellowstone bears on the endangered species list. - - Sincerely,
carole	ehrhardt	Pebble Beach	CA	93953	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Human-caused mortality of grizzly bears has been on the rise, and the Yellowstone population ha surrounding states to manage these bears and permit trophy hunting will add significant pressure to this population. As you know, this population also remains severely isolated and states do not have regulations in place to protect bears that could connect with bears outside an arbitrary boundary are likely to be killed. - - Asking for comments on this proposal is premature because state regulations for bears aren't in place, so it's impossible to determine how bears will be managed once federal protections are removed. Please reco Yellowstone bears on the endangered species list. - - Sincerely,
