Leslie	Calambro	Henrico	VA	23229	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Human-caused mortality of grizzly bears has been on the rise, and the Yellowstone population ha surrounding states to manage these bears and permit trophy hunting will add significant pressure to this population. As you know, this population also remains severely isolated and states do not have regulations in place to protect bears that could connect with bears outside an arbitrary boundary are likely to be killed. - - Asking for comments on this proposal is premature because state regulations for bears aren't in place, so it's impossible to determine how bears will be managed once federal protections are removed. Please reco Yellowstone bears on the endangered species list. - - Sincerely,

Joseph	Jordan	Philadelphia	PA	19135	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Human-caused mortality of grizzly bears has been on the rise, and the Yellowstone population ha surrounding states to manage these bears and permit trophy hunting will add significant pressure to this population. As you know, this population also remains severely isolated and states do not have regulations in place to protect bears that could connect with bears outside an arbitrary boundary are likely to be killed. - - Asking for comments on this proposal is premature because state regulations for bears aren't in place, so it's impossible to determine how bears will be managed once federal protections are removed. Please reco Yellowstone bears on the endangered species list. - - Sincerely,

Martha	Cruz	Edo Mexico	ot	54600	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Human-caused mortality of grizzly bears has been on the rise, and the Yellowstone population ha surrounding states to manage these bears and permit trophy hunting will add significant pressure to this population. As you know, this population also remains severely isolated and states do not have regulations in place to protect bears that could connect with bears outside an arbitrary boundary are likely to be killed. - - Asking for comments on this proposal is premature because state regulations for bears aren't in place, so it's impossible to determine how bears will be managed once federal protections are removed. Please reco Yellowstone bears on the endangered species list. - - Sincerely,

Elloie	Jeter	Florence	MT	59833	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Human-caused mortality of grizzly bears has been on the rise, and the Yellowstone population ha surrounding states to manage these bears and permit trophy hunting will add significant pressure to this population. As you know, this population also remains severely isolated and states do not have regulations in place to protect bears that could connect with bears outside an arbitrary boundary are likely to be killed. - - Asking for comments on this proposal is premature because state regulations for bears aren't in place, so it's impossible to determine how bears will be managed once federal protections are removed. Please reco Yellowstone bears on the endangered species list. - - Sincerely,

Cherryl	Friedman	Noblesville	IN	46062	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Human-caused mortality of grizzly bears has been on the rise, and the Yellowstone population ha surrounding states to manage these bears and permit trophy hunting will add significant pressure to this population. As you know, this population also remains severely isolated and states do not have regulations in place to protect bears that could connect with bears outside an arbitrary boundary are likely to be killed. - - Asking for comments on this proposal is premature because state regulations for bears aren't in place, so it's impossible to determine how bears will be managed once federal protections are removed. Please reco Yellowstone bears on the endangered species list. - - Sincerely,

Human-caused mortality of grizzly bears has been on the rise, and the Yellowstone population ha surrounding states to manage these bears and permit trophy hunting will add significant pressure to this population. As you know, this population also remains severely isolated and states do not have regulations in place to protect bears that could connect with bears outside an arbitrary boundary are likely to be killed. - - Asking for comments on this proposal is premature because state regulations for bears aren't in place, so it's impossible to determine how bears will be managed once federal protections are removed. Please reco Yellowstone bears on the endangered species list. - - Sincerely,
Trp	Hunter	Slc	UT	84108	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Human-caused mortality of grizzly bears has been on the rise, and the Yellowstone population ha surrounding states to manage these bears and permit trophy hunting will add significant pressure to this population. Peter	Bisschop	Tucson	AZ	85748	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Human-caused mortality of grizzly bears has been on the rise, and the Yellowstone population ha surrounding states to manage these bears and permit trophy hunting will add significant pressure to this population. As you know, this population also remains severely isolated and states do not have regulations in place to protect bears that could connect with bears outside an arbitrary boundary are likely to be killed. - - Asking for comments on this proposal is premature because state regulations for bears aren't in place, so it's impossible to determine how bears will be managed once federal protections are removed. Please reco Yellowstone bears on the endangered species list. - - Many of the studies in the federal report recommending delisting have not undergone review by outside scientists or have not been published in scientific journals, a crucial step in validating scientific research. - Fed bears can continue to spread out into areas we know are suitable for bears. - - Yellowstone grizzlies face extraordinary challenges as climate change drives the loss of habitat and food sources. We need to enhance the bear population and stop he killing. People, lifestyl the wildlife. No need to kill the bears. - - There is never a conflict of bears with humans. There is a conflict of humans living in or near the bear habitat. Deal. Cope. Live with it. And be thankful there are bears. - - Scientifically, Whitebark pine trees are at the heart of th Despite their reputation as ferocious killers, grizzlies here have long relied on seeds from whitebark pine trees as a primary food source, and climate change is wiping out the trees. - - The chance of being injured by a bear while in the park is approximately 1 in 1.9 milli killing decisions. Time for management people to get a grip. There is an ecosystem and it needs to be protected. The bears need our protection. Trophy hunts? Give us a break. - - Sincerely,

Please reco Yellowstone bears on the endangered species list. - - Sincerely,
Howard	Gross	Norwalk	CT	6851	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Human-caused mortality of grizzly bears has been on the rise, and the Yellowstone population ha surrounding states to manage these bears and permit trophy hunting will add significant pressure to this population. As you know, this population also remains severely isolated and states do not have regulations in place to protect bears that could connect with bears outside an arbitrary boundary are likely to be killed. - - Asking for comments on this proposal is premature because state regulations for bears aren't in place, so it's impossible to determine how bears will be managed once federal protections are removed. Please reco Yellowstone bears on the endangered species list. - - Sincerely,

Elise	McCoubrie	St. Peters	MO	63376	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Human-caused mortality of grizzly bears has been on the rise, and the Yellowstone population ha surrounding states to manage these bears and permit trophy hunting will add significant pressure to this population. As you know, this population also remains severely isolated and states do not have regulations in place to protect bears that could connect with bears outside an arbitrary boundary are likely to be killed. - - Asking for comments on this proposal is premature because state regulations for bears aren't in place, so it's impossible to determine how bears will be managed once federal protections are removed. Please reco Yellowstone bears on the endangered species list. - - Sincerely,

Mary	Rapp	Chicago	IL	60640	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Human-caused mortality of grizzly bears has been on the rise, and the Yellowstone population ha surrounding states to manage these bears and permit trophy hunting will add significant pressure to this population. As you know, this population also remains severely isolated and states do not have regulations in place to protect bears that could connect with bears outside an arbitrary boundary are likely to be killed. - - Asking for comments on this proposal is premature because state regulations for bears aren't in place, so it's impossible to determine how bears will be managed once federal protections are removed. Please reco Yellowstone bears on the endangered species list. - - Sincerely,

Sherry and Ted	Guzzi	California	CA	96145	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Human-caused mortality of grizzly bears has been on the rise, and the Yellowstone population ha surrounding states to manage these bears and permit trophy hunting would be devastating - hunters are already threatening to target Yellowstone's popular bears.. As you know, this population also remains severely isolated and states do not have regulations in place bears in other areas. Instead, those that wander outside an arbitrary boundary are likely to be killed. - - Asking for comments on this proposal is premature because state regulations for bears aren't in place, so it's impossible to determine how bears will be managed o reconsider this delisting proposal and keep Yellowstone bears on the endangered species list. - - Sincerely,

Please reco Yellowstone bears on the endangered species list. - - Sincerely,
Stacy	Arnold	Millersville	MD	21108	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Human-caused mortality of grizzly bears has been on the rise, and the Yellowstone population ha surrounding states to manage these bears and permit trophy hunting will add significant pressure to this population. As you know, this population also remains severely isolated and states do not have regulations in place to protect bears that could connect with bears outside an arbitrary boundary are likely to be killed. - - Asking for comments on this proposal is premature because state regulations for bears aren't in place, so it's impossible to determine how bears will be managed once federal protections are removed. Please reco Yellowstone bears on the endangered species list. - - Sincerely,
Joel	DeStefano	NY	NY	11949	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Dr. Douglas E.	Johnston, Jr.	Fort Worth	TX	76116	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Human-caused mortality of grizzly bears has been on the rise, and the Yellowstone population ha surrounding states to manage these bears and permit trophy hunting will add significant pressure to this population. As you know, this population also remains severely isolated and states do not have regulations in place to protect bears that could connect with bears outside an arbitrary boundary are likely to be killed. - - Asking for comments on this proposal is premature because state regulations for bears aren't in place, so it's impossible to determine how bears will be managed once federal protections are removed. Please reco Yellowstone bears on the endangered species list. - - Sincerely,
Janet	Weisberg	FL	FL	34108	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Laura	Regan	MN	MN	55810	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Human-caused mortality of grizzly bears has been on the rise, and the Yellowstone population ha surrounding states to manage these bears and permit trophy hunting will add significant pressure to this population. As you know, this population also remains severely isolated and states do not have regulations in place to protect bears that could connect with bears outside an arbitrary boundary are likely to be killed. - - Asking for comments on this proposal is premature because state regulations for bears aren't in place, so it's impossible to determine how bears will be managed once federal protections are removed. Please reco Yellowstone bears on the endangered species list. - - Sincerely,

Please reco Yellowstone bears on the endangered species list. - - Sincerely,
Linda	Rossin	Lake Hopatcong	NJ	7849	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Human-caused mortality of grizzly bears has been on the rise, and the Yellowstone population ha surrounding states to manage these bears and permit hunting will add significant pressure to this population, all for the sake of a minority of trophy hunters and to add a few extra dollars to each state's coffer. This population also remains severely isolated and states d protect bears that could connect with bears in other areas. Instead, those that wander outside an arbitrary boundary are likely to be killed. A tragic mistake for all of us. - - Asking for comments on this proposal is premature because state regulations for bears aren't in bears will be managed once federal protections are removed. Please reconsider this delisting proposal and keep Yellowstone bears on the endangered species list. - - Sincerely,

Claudia	McNiff	Chandler	AZ	85224	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Human-caused mortality of grizzly bears has been on the rise, and the Yellowstone population ha surrounding states to manage these bears and permit trophy hunting will add significant pressure to this population. As you know, this population also remains severely isolated and states do not have regulations in place to protect bears that could connect with bears outside an arbitrary boundary are likely to be killed. - - Asking for comments on this proposal is premature because state regulations for bears aren't in place, so it's impossible to determine how bears will be managed once federal protections are removed. Please reco Yellowstone bears on the endangered species list. - - Sincerely,
Brian	Bielema	Morrison	IL	61270	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. James	Ring	Kansas	KS	66048	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Human-caused mortality of grizzly bears has been on the rise, and the Yellowstone population ha surrounding states to manage these bears and permit trophy hunting will add significant pressure to this population. As you know, this population also remains severely isolated and states do not have regulations in place to protect bears that could connect with bears outside an arbitrary boundary are likely to be killed. - - Asking for comments on this proposal is premature because state regulations for bears aren't in place, so it's impossible to determine how bears will be managed once federal protections are removed. Please reco Yellowstone bears on the endangered species list. - - Sincerely,

Please reco Yellowstone bears on the endangered species list. - - Sincerely,
Kathleen J	Welsh	North Brunswick	NJ	8902	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Human-caused mortality of grizzly bears has been on the rise, and the Yellowstone population ha surrounding states to manage these bears and permit trophy hunting will add significant pressure to this population. As you know, this population also remains severely isolated and states do not have regulations in place to protect bears that could connect with bears outside an arbitrary boundary are likely to be killed. - - Asking for comments on this proposal is premature because state regulations for bears aren't in place, so it's impossible to determine how bears will be managed once federal protections are removed. Please reco Yellowstone bears on the endangered species list. - - Sincerely,

Patricia	Rogler	MA	MA	2769	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Human-caused mortality of grizzly bears has been on the rise, and the Yellowstone population ha surrounding states to manage these bears and permit trophy hunting will add significant pressure to this population. As you know, this population also remains severely isolated and states do not have regulations in place to protect bears that could connect with bears outside an arbitrary boundary are likely to be killed. - - Asking for comments on this proposal is premature because state regulations for bears aren't in place, so it's impossible to determine how bears will be managed once federal protections are removed. Please reco Yellowstone bears on the endangered species list. - - Sincerely,

Karen	Olch	Eugene	OR	97440	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Human-caused mortality of grizzly bears has been on the rise, and the Yellowstone population ha surrounding states to manage these bears and permit trophy hunting will add significant pressure to this population and bring on irreparable damage. As you know, this population also remains severely isolated and states do not have regulations in place to protect bea areas. Bears need this connectivity to maintain genetic diversity! I'm sure you are aware of that. Instead, those that wander outside an arbitrary boundary are likely to be killed. - - Asking for comments on this proposal is premature because state regulations for bears a how bears will be managed once federal protections are removed. Please reconsider this delisting proposal and keep Yellowstone bears on the endangered species list. I believe it is your job to protect wildlife so I expect that you will live up to this expectation. - - Since

As you know, this population also remains severely isolated and states do not have regulations in place to protect bears that could connect with bears outside an arbitrary boundary are likely to be killed. - - Asking for comments on this proposal is premature because state regulations for bears aren't in place, so it's impossible to determine how bears will be managed once federal protections are removed. Please reco Yellowstone bears on the endangered species list. - - Sincerely,
Julia	Petipas	Somerville	MA	2144	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Human-caused mortality of grizzly bears has been on the rise, and the Yellowstone population ha surrounding states to manage these bears and permit trophy hunting will add significant pressure to this population. As you know, this population also remains severely isolated and states do not have regulations in place to protect bears that could connect with bears outside an arbitrary boundary are likely to be killed. - - Asking for comments on this proposal is premature because state regulations for bears aren't in place, so it's impossible to determine how bears will be managed once federal protections are removed. Leopoldina	Jovanovski	None	ot	42000	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Human-caused mortality of grizzly bears has been on the rise, and the Yellowstone population ha surrounding states to manage these bears and permit trophy hunting will add significant pressure to this population. As you know, this population also remains severely isolated and states do not have regulations in place to protect bears that could connect with bears outside an arbitrary boundary are likely to be killed. - - Asking for comments on this proposal is premature because state regulations for bears aren't in place, so it's impossible to determine how bears will be managed once federal protections are removed. Please reco Yellowstone bears on the endangered species list. - - Sincerely,

Richard	Krygowski	Ponte vedra beach	FL	32082	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Human-caused mortality of grizzly bears has been on the rise, and the Yellowstone population ha surrounding states to manage these bears and permit trophy hunting will add significant pressure to this population. As you know, this population also remains severely isolated and states do not have regulations in place to protect bears that could connect with bears outside an arbitrary boundary are likely to be killed. - - Asking for comments on this proposal is premature because state regulations for bears aren't in place, so it's impossible to determine how bears will be managed once federal protections are removed. Please reco Yellowstone bears on the endangered species list. - - Sincerely,
Eric	Crosley	Lansing	MI	48912	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Human-caused mortality of grizzly bears has been on the rise, and the Yellowstone population ha surrounding states to manage these bears and permit trophy hunting will add significant pressure to this population. As you know, this population also remains severely isolated and states do not have regulations in place to protect bears that could connect with bears outside an arbitrary boundary are likely to be killed. - - Asking for comments on this proposal is premature because state regulations for bears aren't in place, so it's impossible to determine how bears will be managed once federal protections are removed. Please reco Yellowstone bears on the endangered species list. - - Sincerely,
Kelly	King	Mt. Pleasant	PA	15666	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Human-caused mortality of grizzly bears has been on the rise, and the Yellowstone population ha surrounding states to manage these bears and permit trophy hunting will add significant pressure to this population. As you know, this population also remains severely isolated and states do not have regulations in place to protect bears that could connect with bears outside an arbitrary boundary are likely to be killed. - - Asking for comments on this proposal is premature because state regulations for bears aren't in place, so it's impossible to determine how bears will be managed once federal protections are removed. Charlene	Johnson	Wesley Chapel	FL	33544	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Human-caused mortality of grizzly bears has been on the rise, and the Yellowstone population ha surrounding states to manage these bears and permit trophy hunting will add significant pressure to this population. As you know, this population also remains severely isolated and states do not have regulations in place to protect bears that could connect with bears outside an arbitrary boundary are likely to be killed. - - Asking for comments on this proposal is premature because state regulations for bears aren't in place, so it's impossible to determine how bears will be managed once federal protections are removed. Please reco Yellowstone bears on the endangered species list. - - Sincerely,
Marilyn	Egan	Delray Beach	FL	33484	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Please reco Yellowstone bears on the endangered species list. - - Sincerely,
Grace	Agnew	Highland Park	NJ	8904	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Human-caused mortality of grizzly bears has been on the rise, and the Yellowstone population ha surrounding states to manage these bears and permit trophy hunting will add significant pressure to this population. As you know, this population also remains severely isolated and states do not have regulations in place to protect bears that could connect with bears outside an arbitrary boundary are likely to be killed. - - Asking for comments on this proposal is premature because state regulations for bears aren't in place, so it's impossible to determine how bears will be managed once federal protections are removed. Please reco Yellowstone bears on the endangered species list. - - Sincerely,

Please reco Yellowstone bears on the endangered species list. - - Sincerely,
Aimee	Millensifer	Denver	CO	80231	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Human-caused mortality of grizzly bears has been on the rise, and the Yellowstone population ha surrounding states to manage these bears and permit trophy hunting will add significant pressure to this population. As you know, this population also remains severely isolated and states do not have regulations in place to protect bears that could connect with bears outside an arbitrary boundary are likely to be killed. - - Asking for comments on this proposal is premature because state regulations for bears aren't in place, so it's impossible to determine how bears will be managed once federal protections are removed. Please reco Yellowstone bears on the endangered species list. - - Sincerely,

Susan	Siens	Unity	ME	4988	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Human-caused mortality of grizzly bears has been on the rise, and the Yellowstone population ha surrounding states to manage these bears and permit trophy hunting will add significant pressure to this population. As you know, this population also remains severely isolated and states do not have regulations in place to protect bears that could connect with bears outside an arbitrary boundary are likely to be killed. - - Asking for comments on this proposal is premature because state regulations for bears aren't in place, so it's impossible to determine how bears will be managed once federal protections are removed. Please reco Yellowstone bears on the endangered species list. - - Sincerely,

Ann	Watters	Salem	OR	97301	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Human-caused mortality of grizzly bears has been on the rise, and the Yellowstone population ha surrounding states to manage these bears and permit trophy hunting will add significant pressure to this population. As you know, this population also remains severely isolated and states do not have regulations in place to protect bears that could connect with bears outside an arbitrary boundary are likely to be killed. - - Asking for comments on this proposal is premature because state regulations for bears aren't in place, so it's impossible to determine how bears will be managed once federal protections are removed. Please reco Yellowstone bears on the endangered species list. - - Sincerely,

Liliana	Silvano	Grand Junction	CO	81504	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Human-caused mortality of grizzly bears has been on the rise, and the Yellowstone population ha surrounding states to manage these bears and permit trophy hunting will add significant pressure to this population. As you know, this population also remains severely isolated and states do not have regulations in place to protect bears that could connect with bears outside an arbitrary boundary are likely to be killed. - - Asking for comments on this proposal is premature because state regulations for bears aren't in place, so it's impossible to determine how bears will be managed once federal protections are removed. Please reco Yellowstone bears on the endangered species list. - - Sincerely,

Sean	McFeeley	NJ	NJ	8030	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Human-caused mortality of grizzly bears has been on the rise, and the Yellowstone population ha surrounding states to manage these bears and permit trophy hunting will add significant pressure to this population. As you know, this population also remains severely isolated and states do not have regulations in place to protect bears that could connect with bears outside an arbitrary boundary are likely to be killed. - - Asking for comments on this proposal is premature because state regulations for bears aren't in place, so it's impossible to determine how bears will be managed once federal protections are removed. Please reco Yellowstone bears on the endangered species list. - - Sincerely,

Bonnie	Ricca	Redwood City	CA	94061	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Human-caused mortality of grizzly bears has been on the rise, and the Yellowstone population ha surrounding states to manage these bears and permit trophy hunting will add significant pressure to this population. As you know, this population also remains severely isolated and states do not have regulations in place to protect bears that could connect with bears outside an arbitrary boundary are likely to be killed. - - Asking for comments on this proposal is premature because state regulations for bears aren't in place, so it's impossible to determine how bears will be managed once federal protections are removed. Please reco Yellowstone bears on the endangered species list. - - Sincerely,

Please reco Yellowstone bears on the endangered species list. - - Sincerely,
Arlene	O'Brien	Bethel Park	PA	15102	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Human-caused mortality of grizzly bears has been on the rise, and the Yellowstone population ha surrounding states to manage these bears and permit trophy hunting will add significant pressure to this population. As you know, this population also remains severely isolated and states do not have regulations in place to protect bears that could connect with bears outside an arbitrary boundary are likely to be killed. - - Asking for comments on this proposal is premature because state regulations for bears aren't in place, so it's impossible to determine how bears will be managed once federal protections are removed. Please reco Yellowstone bears on the endangered species list. - - Sincerely,

Please reco Yellowstone bears on the endangered species list. - - Sincerely,
Peter	Leddy	Riverside	RI	2915	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Human-caused mortality of grizzly bears has been on the rise, and the Yellowstone population ha surrounding states to manage these bears and permit trophy hunting will add significant pressure to this population. As you know, this population also remains severely isolated and states do not have regulations in place to protect bears that could connect with bears outside an arbitrary boundary are likely to be killed. - - Asking for comments on this proposal is premature because state regulations for bears aren't in place, so it's impossible to determine how bears will be managed once federal protections are removed. Please reco Yellowstone bears on the endangered species list. - - Sincerely,

Marla	Oliver	Florence	KY	41042	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Human-caused mortality of grizzly bears has been on the rise, and the Yellowstone population ha surrounding states to manage these bears and permit trophy hunting will add significant pressure to this population. As you know, this population also remains severely isolated and states do not have regulations in place to protect bears that could connect with bears outside an arbitrary boundary are likely to be killed. - - Asking for comments on this proposal is premature because state regulations for bears aren't in place, so it's impossible to determine how bears will be managed once federal protections are removed. Please reco Yellowstone bears on the endangered species list. - - Sincerely,

Tracey	Viney	OK	OK	73026	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Human-caused mortality of grizzly bears has been on the rise, and the Yellowstone population ha surrounding states to manage these bears and permit trophy hunting will add significant pressure to this population. As you know, this population also remains severely isolated and states do not have regulations in place to protect bears that could connect with bears outside an arbitrary boundary are likely to be killed. - - Asking for comments on this proposal is premature because state regulations for bears aren't in place, so it's impossible to determine how bears will be managed once federal protections are removed. Please reco Yellowstone bears on the endangered species list. - - Sincerely,

Danusia	Tsu	NC	NC	28078	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Human-caused mortality of grizzly bears has been on the rise, and the Yellowstone population ha surrounding states to manage these bears and permit trophy hunting will add significant pressure to this population. As you know, this population also remains severely isolated and states do not have regulations in place to protect bears that could connect with bears outside an arbitrary boundary are likely to be killed. - - Asking for comments on this proposal is premature because state regulations for bears aren't in place, so it's impossible to determine how bears will be managed once federal protections are removed. Please reco Yellowstone bears on the endangered species list. - - Sincerely,

Carol	Copp	VA	VA	23803	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Human-caused mortality of grizzly bears has been on the rise, and the Yellowstone population ha surrounding states to manage these bears and permit trophy hunting will add significant pressure to this population. As you know, this population also remains severely isolated and states do not have regulations in place to protect bears that could connect with bears outside an arbitrary boundary are likely to be killed. - - Asking for comments on this proposal is premature because state regulations for bears aren't in place, so it's impossible to determine how bears will be managed once federal protections are removed. Please reco Yellowstone bears on the endangered species list. - - Sincerely,

Please reco Yellowstone bears on the endangered species list. - - Sincerely,
Ellen	Edwards	Fort Collins	CO	80521	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Human-caused mortality of grizzly bears has been on the rise, and the Yellowstone population ha surrounding states to manage these bears and permit trophy hunting will add significant pressure to this population. As you know, this population also remains severely isolated and states do not have regulations in place to protect bears that could connect with bears outside an arbitrary boundary are likely to be killed. - - Asking for comments on this proposal is premature because state regulations for bears aren't in place, so it's impossible to determine how bears will be managed once federal protections are removed. Please reco Yellowstone bears on the endangered species list. - - Sincerely,

Joseph	Sellner	Union City	CA	94587	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Human-caused mortality of grizzly bears has been on the rise, and the Yellowstone population ha surrounding states to manage these bears and permit trophy hunting will add significant pressure to this population. As you know, this population also remains severely isolated and states do not have regulations in place to protect bears that could connect with bears outside an arbitrary boundary are likely to be killed. - - Asking for comments on this proposal is premature because state regulations for bears aren't in place, so it's impossible to determine how bears will be managed once federal protections are removed. Please reco Yellowstone bears on the endangered species list. - - Sincerely,

Elliott	Birckhead	Charleston	WV	25314	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Human-caused mortality of grizzly bears has been on the rise, and the Yellowstone population ha surrounding states to manage these bears and permit trophy hunting will add significant pressure to this population. As you know, this population also remains severely isolated and states do not have regulations in place to protect bears that could connect with bears outside an arbitrary boundary are likely to be killed. - - Asking for comments on this proposal is premature because state regulations for bears aren't in place, so it's impossible to determine how bears will be managed once federal protections are removed. Please reco Yellowstone bears on the endangered species list. - - Sincerely,

Kacy	Harnedy	Nashua	NH	3060	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Human-caused mortality of grizzly bears has been on the rise, and the Yellowstone population ha surrounding states to manage these bears and permit trophy hunting will add significant pressure to this population. As you know, this population also remains severely isolated and states do not have regulations in place to protect bears that could connect with bears outside an arbitrary boundary are likely to be killed. - - Asking for comments on this proposal is premature because state regulations for bears aren't in place, so it's impossible to determine how bears will be managed once federal protections are removed. Please reco Yellowstone bears on the endangered species list. - - Sincerely,

Charlotte	Harbeson	Hamilton Valley	CA	93514	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Human-caused mortality of grizzly bears has been on the rise, and the Yellowstone population ha surrounding states to manage these bears and permit trophy hunting will add significant pressure to this population. As you know, this population also remains severely isolated and states do not have regulations in place to protect bears that could connect with bears outside an arbitrary boundary are likely to be killed. - - Asking for comments on this proposal is premature because state regulations for bears aren't in place, so it's impossible to determine how bears will be managed once federal protections are removed. Please reco Yellowstone bears on the endangered species list. - - Sincerely,

Please reco Yellowstone bears on the endangered species list. - - Sincerely,
gretchen	clark	marina del rey	CA	90292	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Human-caused mortality of grizzly bears has been on the rise, and the Yellowstone population ha surrounding states to manage these bears and permit trophy hunting will add significant pressure to this population. As you know, this population also remains severely isolated and states do not have regulations in place to protect bears that could connect with bears outside an arbitrary boundary are likely to be killed. - - Asking for comments on this proposal is premature because state regulations for bears aren't in place, so it's impossible to determine how bears will be managed once federal protections are removed. Please reco Yellowstone bears on the endangered species list. - - Sincerely,

Kathleen	Brentlinger	Terre Haute	IN	47805	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Human-caused mortality of grizzly bears has been on the rise, and the Yellowstone population ha surrounding states to manage these bears and permit trophy hunting will add significant pressure to this population. As you know, this population also remains severely isolated and states do not have regulations in place to protect bears that could connect with bears outside an arbitrary boundary are likely to be killed. - - Asking for comments on this proposal is premature because state regulations for bears aren't in place, so it's impossible to determine how bears will be managed once federal protections are removed. Please reco Yellowstone bears on the endangered species list. - - Sincerely,

Please reco Yellowstone bears on the endangered species list. - - Also to allow Wyoming, Montana and Idaho to take over management of the Grizzly in their states would be a big mistake, they would not manage but would eliminate the species all together. This has been proven timber wolf once it was delisted. They have no interest in protecting those species. - Sincerely,

As you know, this population also remains severely isolated and states do not have regulations in place to protect bears that could connect with bears outside an arbitrary boundary are likely to be killed. - - Asking for comments on this proposal is premature because state regulations for bears aren't in place, so it's impossible to determine how bears will be managed once federal protections are removed. Please reco Yellowstone bears on the endangered species list. - - Sincerely,
Nimmi	Schueller	Ann Arbor	MI	48104	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Human-caused mortality of grizzly bears has been on the rise, and the Yellowstone population ha surrounding states to manage these bears and permit trophy hunting will add significant pressure to this population. As you know, this population also remains severely isolated and states do not have regulations in place to protect bears that could connect with bears outside an arbitrary boundary are likely to be killed. - - Asking for comments on this proposal is premature because state regulations for bears aren't in place, so it's impossible to determine how bears will be managed once federal protections are removed.
