Laurie	Borkowski	Toms River	NJ	8753	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Human-caused mortality of grizzly bears has been on the rise, and the Yellowstone population ha surrounding states to manage these bears and permit trophy hunting will add significant pressure to this population. As you know, this population also remains severely isolated and states do not have regulations in place to protect bears that could connect with bears outside an arbitrary boundary are likely to be killed. - - Asking for comments on this proposal is premature because state regulations for bears aren't in place, so it's impossible to determine how bears will be managed once federal protections are removed. Please reco Yellowstone bears on the endangered species list. - - Sincerely,

Kathleen	Hanlon	Bellmore	NY	11710	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Human-caused mortality of grizzly bears has been on the rise, and the Yellowstone population ha surrounding states to manage these bears and permit trophy hunting will add significant pressure to this population. As you know, this population also remains severely isolated and states do not have regulations in place to protect bears that could connect with bears outside an arbitrary boundary are likely to be killed. - - Asking for comments on this proposal is premature because state regulations for bears aren't in place, so it's impossible to determine how bears will be managed once federal protections are removed. Please reco Yellowstone bears on the endangered species list. - - Sincerely,

Josee	Taylor	Nottingham	ot	NG8 3AU	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Human-caused mortality of grizzly bears has been on the rise, and the Yellowstone population ha surrounding states to manage these bears and permit trophy hunting will add significant pressure to this population. As you know, this population also remains severely isolated and states do not have regulations in place to protect bears that could connect with bears outside an arbitrary boundary are likely to be killed. - - Asking for comments on this proposal is premature because state regulations for bears aren't in place, so it's impossible to determine how bears will be managed once federal protections are removed. Please reco Yellowstone bears on the endangered species list. - - Sincerely,

marla	feierabend	CA	CA	93109	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Human-caused mortality of grizzly bears has been on the rise, and the Yellowstone population ha surrounding states to manage these bears and permit trophy hunting will add significant pressure to this population. As you know, this population also remains severely isolated and states do not have regulations in place to protect bears that could connect with bears outside an arbitrary boundary are likely to be killed. - - Asking for comments on this proposal is premature because state regulations for bears aren't in place, so it's impossible to determine how bears will be managed once federal protections are removed. Please reco Yellowstone bears on the endangered species list. - - Sincerely,

M	Port	Boynton Beach	FL	33472	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Human-caused mortality of grizzly bears has been on the rise, and the Yellowstone population ha surrounding states to manage these bears and permit trophy hunting will add significant pressure to this population. As you know, this population also remains severely isolated and states do not have regulations in place to protect bears that could connect with bears outside an arbitrary boundary are likely to be killed. - - Asking for comments on this proposal is premature because state regulations for bears aren't in place, so it's impossible to determine how bears will be managed once federal protections are removed. Please reco Yellowstone bears on the endangered species list. - - Sincerely,
Pamela	Nowell	Lynchburg	VA	24503	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Human-caused mortality of grizzly bears has been on the rise, and the Yellowstone population ha surrounding states to manage these bears and permit trophy hunting will add significant pressure to this population. As you know, this population also remains severely isolated and states do not have regulations in place to protect bears that could connect with bears outside an arbitrary boundary are likely to be killed. - - on a personal addition, these animals are wildlife that came first and should not be sacrificed or taken off of the federal protection list. My husband and I support Yellowstone National Park. In my visits to Yellow of all of the nature offered. I am urging you to please continue to protect these bears (and other wildlife) and not remove them for the protection of your organizations. I also urge you not to have these bears isolated. Humans need to prioritize conserving the nature living within the scope of nature, not continuing to change the environment to suit human wants and needs. - - Thank you for your time and attention in this crucial matter. - - Asking for comments on this proposal is premature because state regulations for bears aren bears will be managed once federal protections are removed. Please reconsider this delisting proposal and keep Yellowstone bears on the endangered species list. - - Sincerely,
Tracy	Capps	mascoutah	IL	62258	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Human-caused mortality of grizzly bears has been on the rise, and the Yellowstone population ha surrounding states to manage these bears and permit trophy hunting will add significant pressure to this population. As you know, this population also remains severely isolated and states do not have regulations in place to protect bears that could connect with bears outside an arbitrary boundary are likely to be killed. - - Asking for comments on this proposal is premature because state regulations for bears aren't in place, so it's impossible to determine how bears will be managed once federal protections are removed. Please reco Yellowstone bears on the endangered species list. - - Sincerely,
Kaethy	Kennedy	Napa	CA	94558	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Human-caused mortality of grizzly bears has been on the rise, and the Yellowstone population ha surrounding states to manage these bears and permit trophy hunting will add significant pressure to this population. As you know, this population also remains severely isolated and states do not have regulations in place to protect bears that could connect with bears outside an arbitrary boundary are likely to be killed. - - Asking for comments on this proposal is premature because state regulations for bears aren't in place, so it's impossible to determine how bears will be managed once federal protections are removed. Human-caused mortality of grizzly bears has been on the rise, and the Yellowstone population ha surrounding states to manage these bears and permit trophy hunting will add significant pressure to this population. As you know, this population also remains severely isolated and states do not have regulations in place to protect bears that could connect with bears outside an arbitrary boundary are likely to be killed. - - Asking for comments on this proposal is premature because state regulations for bears aren't in place, so it's impossible to determine how bears will be managed once federal protections are removed. Please reco Yellowstone bears on the endangered species list. - - Sincerely,
Katie	Shultz Walker	Portland	OR	97266	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Human-caused mortality of grizzly bears has been on the rise, and the Yellowstone population ha surrounding states to manage these bears and permit trophy hunting will add significant pressure to this population. As you know, this population also remains severely isolated and states do not have regulations in place to protect bears that could connect with bears outside an arbitrary boundary are likely to be killed. - - Asking for comments on this proposal is premature because state regulations for bears aren't in place, so it's impossible to determine how bears will be managed once federal protections are removed. Maryann	Atlas	Branford	CT	6405	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Human-caused mortality of grizzly bears has been on the rise, and the Yellowstone population ha surrounding states to manage these bears and permit trophy hunting will add significant pressure to this population. As you know, this population also remains severely isolated and states do not have regulations in place to protect bears that could connect with bears outside an arbitrary boundary are likely to be killed. - - Asking for comments on this proposal is premature because state regulations for bears aren't in place, so it's impossible to determine how bears will be managed once federal protections are removed. Please reco Yellowstone bears on the endangered species list. - - Sincerely,

Michael	Breslin	dunellen	NJ	8812	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Human-caused mortality of grizzly bears has been on the rise, and the Yellowstone population ha surrounding states to manage these bears and permit trophy hunting will add significant pressure to this population. As you know, this population also remains severely isolated and states do not have regulations in place to protect bears that could connect with bears outside an arbitrary boundary are likely to be killed. - - Asking for comments on this proposal is premature because state regulations for bears aren't in place, so it's impossible to determine how bears will be managed once federal protections are removed. Please reco Yellowstone bears on the endangered species list. - - Sincerely,

James	Lin	Albuquerque	NM	87111	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Human-caused mortality of grizzly bears has been on the rise, and the Yellowstone population ha surrounding states to manage these bears and permit trophy hunting will add significant pressure to this population. As you know, this population also remains severely isolated and states do not have regulations in place to protect bears that could connect with bears outside an arbitrary boundary are likely to be killed. - - Asking for comments on this proposal is premature because state regulations for bears aren't in place, so it's impossible to determine how bears will be managed once federal protections are removed. Please reco Yellowstone bears on the endangered species list. - - Sincerely,

Mary	Cleator	Glenwood Springs	CO	81601	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Human-caused mortality of grizzly bears has been on the rise, and the Yellowstone population ha surrounding states to manage these bears and permit trophy hunting will add significant pressure to this population. As you know, this population also remains severely isolated and states do not have regulations in place to protect bears that could connect with bears outside an arbitrary boundary are likely to be killed. - - Asking for comments on this proposal is premature because state regulations for bears aren't in place, so it's impossible to determine how bears will be managed once federal protections are removed. Please reco Yellowstone bears on the endangered species list. - - Sincerely,

Carol	Birkenstock	Port Charlotte	FL	33948	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Human-caused mortality of grizzly bears has been on the rise, and the Yellowstone population ha surrounding states to manage these bears and permit trophy hunting will add significant pressure to this population. As you know, this population also remains severely isolated and states do not have regulations in place to protect bears that could connect with bears outside an arbitrary boundary are likely to be killed. - - Asking for comments on this proposal is premature because state regulations for bears aren't in place, so it's impossible to determine how bears will be managed once federal protections are removed. Please reco Yellowstone bears on the endangered species list. - - Sincerely,

Please reco Yellowstone bears on the endangered species list. - - Sincerely,
Amanda	Raymond	Palmyra	NY	14522	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Human-caused mortality of grizzly bears has been on the rise, and the Yellowstone population ha surrounding states to manage these bears and permit trophy hunting will add significant pressure to this population. As you know, this population also remains severely isolated and states do not have regulations in place to protect bears that could connect with bears outside an arbitrary boundary are likely to be killed. - - Asking for comments on this proposal is premature because state regulations for bears aren't in place, so it's impossible to determine how bears will be managed once federal protections are removed. Please reco Yellowstone bears on the endangered species list. - - Sincerely,

Please reco Yellowstone bears on the endangered species list. - - These beautiful, iconic creatures shouldn't wind up being trophies for "sport" hunters. Please relist them as endangered. We owe this to future generations of people -- and bears. - - Sincerely,
Gary	Cornett	Corpus Christi	TX	78410	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Human-caused mortality of grizzly bears has been on the rise, and the Yellowstone population ha surrounding states to manage these bears and permit trophy hunting will add significant pressure to this population. As you know, this population also remains severely isolated and states do not have regulations in place to protect bears that could connect with bears outside an arbitrary boundary are likely to be killed. - - Asking for comments on this proposal is premature because state regulations for bears aren't in place, so it's impossible to determine how bears will be managed once federal protections are removed. Please reco Yellowstone bears on the endangered species list. - - Sincerely,

Judy	Masters	OR	OR	97526	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Human-caused mortality of grizzly bears has been on the rise, and the Yellowstone population ha surrounding states to manage these bears and permit trophy hunting will add significant pressure to this population. As you know, this population also remains severely isolated and states do not have regulations in place to protect bears that could connect with bears outside an arbitrary boundary are likely to be killed. - - Asking for comments on this proposal is premature because state regulations for bears aren't in place, so it's impossible to determine how bears will be managed once federal protections are removed. Please reco Yellowstone bears on the endangered species list. - - Sincerely,

Please reco Yellowstone bears on the endangered species list. - - The BEAR'S absolutely must Free-Range. - If there hunted, they will also hunt the Hunter's. There smart and cunning. - After I relocated from Alaska a friend and Professional Bear Hunter told me that are aggressive a somebody's Family or Pet's a decision would be made by Fish & Game as to how to deal with a "problem" Bear. My friend met one at the corner of a building after a night at the bar, He was mauled to death. The very thing he had amongst other things warned me abou Humanity is the Predator. Bear's just want to eat. Unless it's mating season or Cubs are with them. Then, they are extremely dangerous. - Barney Groat of King Salmon, AK, RIP. - - Sincerely,

Thomas	Melnichok	Oakland	ME	4963	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Human-caused mortality of grizzly bears has been on the rise, and the Yellowstone population ha surrounding states to manage these bears and permit trophy hunting will add significant pressure to this population. As you know, this population also remains severely isolated and states do not have regulations in place to protect bears that could connect with bears outside an arbitrary boundary are likely to be killed. - - Asking for comments on this proposal is premature because state regulations for bears aren't in place, so it's impossible to determine how bears will be managed once federal protections are removed. Please reco Yellowstone bears on the endangered species list. - - Sincerely,

REBECCA	STJOHN	Harrison Township	MI	48045	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Human-caused mortality of grizzly bears has been on the rise, and the Yellowstone population ha surrounding states to manage these bears and permit trophy hunting will add significant pressure to this population. As you know, this population also remains severely isolated and states do not have regulations in place to protect bears that could connect with bears outside an arbitrary boundary are likely to be killed. - - Asking for comments on this proposal is premature because state regulations for bears aren't in place, so it's impossible to determine how bears will be managed once federal protections are removed. Please reco Yellowstone bears on the endangered species list. - - Sincerely,
Donna	Adams	Newton	MA	2461	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Alyssa	Morgan	Aurora	CO	80015	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Human-caused mortality of grizzly bears has been on the rise, and the Yellowstone population ha surrounding states to manage these bears and permit trophy hunting will add significant pressure to this population. As you know, this population also remains severely isolated and states do not have regulations in place to protect bears that could connect with bears outside an arbitrary boundary are likely to be killed. - - Asking for comments on this proposal is premature because state regulations for bears aren't in place, so it's impossible to determine how bears will be managed once federal protections are removed. Please reco Yellowstone bears on the endangered species list. - - Sincerely,

Please reco Yellowstone bears on the endangered species list. - - Sincerely,
John	D'hondt	Dunmanway	ot	000 00	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Human-caused mortality of grizzly bears has been on the rise, and the Yellowstone population ha surrounding states to manage these bears and permit trophy hunting will add significant pressure to this population. As you know, this population also remains severely isolated and states do not have regulations in place to protect bears that could connect with bears outside an arbitrary boundary are likely to be killed. - - Asking for comments on this proposal is premature because state regulations for bears aren't in place, so it's impossible to determine how bears will be managed once federal protections are removed. Please reco Yellowstone bears on the endangered species list. - - Sincerely,

John	Weston	Kenosha	WI	53143	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Human-caused mortality of grizzly bears has been on the rise, and the Yellowstone population ha surrounding states to manage these bears and permit trophy hunting will add significant pressure to this population. As you know, this population also remains severely isolated and states do not have regulations in place to protect bears that could connect with bears outside an arbitrary boundary are likely to be killed. - - Asking for comments on this proposal is premature because state regulations for bears aren't in place, so it's impossible to determine how bears will be managed once federal protections are removed. Please reco Yellowstone bears on the endangered species list. - - Sincerely,

Dara	Jaeger	Charles City	IA	50616	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Human-caused mortality of grizzly bears has been on the rise, and the Yellowstone population ha surrounding states to manage these bears and permit trophy hunting will add significant pressure to this population. As you know, this population also remains severely isolated and states do not have regulations in place to protect bears that could connect with bears outside an arbitrary boundary are likely to be killed. - - Asking for comments on this proposal is premature because state regulations for bears aren't in place, so it's impossible to determine how bears will be managed once federal protections are removed. Please reco Yellowstone bears on the endangered species list. - - Sincerely,

Please reco Yellowstone bears on the endangered species list. - - Sincerely,
Lisa Koch	Fajardo	Vestal	NY	13850	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Human-caused mortality of grizzly bears has been on the rise, and the Yellowstone population ha surrounding states to manage these bears and permit trophy hunting will add significant pressure to this population. As you know, this population also remains severely isolated and states do not have regulations in place to protect bears that could connect with bears outside an arbitrary boundary are likely to be killed. - - Asking for comments on this proposal is premature because state regulations for bears aren't in place, so it's impossible to determine how bears will be managed once federal protections are removed. Please reco Yellowstone bears on the endangered species list. - - Sincerely,
Jim	Weber	Iron mountain	MI	49801	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. As you know, this population also remains severely isolated and states do not have regulations in place to protect bears that could connect with bears outside an arbitrary boundary are likely to be killed. Whatever are you thinking of? I hope it is not money from trophy hunters. The bears are an isolated gene pool and we need to concentrate on opening paths to their Canadian counterparts rather than relisting and we eat bear meat. The only reason to shoot a bear is to display it. Pretty silly! - Asking for comments on this proposal is premature because state regulations for bears aren't in place, so it's impossible to determine how bears will be managed once federal protections a proposal and keep Yellowstone bears on the endangered species list. - - Sincerely,

Martha	Agnew	Swampscott	MA	1907	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Human-caused mortality of grizzly bears has been on the rise, and the Yellowstone population ha surrounding states to manage these bears and permit trophy hunting will add significant pressure to this population. As you know, this population also remains severely isolated and states do not have regulations in place to protect bears that could connect with bears outside an arbitrary boundary are likely to be killed. - - Asking for comments on this proposal is premature because state regulations for bears aren't in place, so it's impossible to determine how bears will be managed once federal protections are removed. Please reco Yellowstone bears on the endangered species list. - - Sincerely,
Diane	Wildes	Massachusetts	MA	1834	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Please reco Yellowstone bears on the endangered species list. - - Sincerely,
Joanne	Colson	Indianapolis	IN	46229	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Human-caused mortality of grizzly bears has been on the rise, and the Yellowstone population ha surrounding states to manage these bears and permit trophy hunting will add significant pressure to this population. As you know, this population also remains severely isolated and states do not have regulations in place to protect bears that could connect with bears outside an arbitrary boundary are likely to be killed. - - Asking for comments on this proposal is premature because state regulations for bears aren't in place, so it's impossible to determine how bears will be managed once federal protections are removed. Please reco Yellowstone bears on the endangered species list. - - Sincerely,

Please reco Yellowstone bears on the endangered species list. - - Sincerely,
Caroline	Reece	Port Talbot	ot	SA13 2LE	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Human-caused mortality of grizzly bears has been on the rise, and the Yellowstone population ha surrounding states to manage these bears and permit trophy hunting will add significant pressure to this population. As you know, this population also remains severely isolated and states do not have regulations in place to protect bears that could connect with bears outside an arbitrary boundary are likely to be killed. - - Asking for comments on this proposal is premature because state regulations for bears aren't in place, so it's impossible to determine how bears will be managed once federal protections are removed. Please reco Yellowstone bears on the endangered species list. - - Sincerely,

gail	lytle	turlock	CA	95382	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Human-caused mortality of grizzly bears has been on the rise, and the Yellowstone population ha surrounding states to manage these bears and permit trophy hunting will add significant pressure to this population. As you know, this population also remains severely isolated and states do not have regulations in place to protect bears that could connect with bears outside an arbitrary boundary are likely to be killed. - - Asking for comments on this proposal is premature because state regulations for bears aren't in place, so it's impossible to determine how bears will be managed once federal protections are removed. Please reco Yellowstone bears on the endangered species list. - - Sincerely,

Suzanne	LeFever	Auburn	NY	13021	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Human-caused mortality of grizzly bears has been on the rise, and the Yellowstone population ha surrounding states to manage these bears and permit trophy hunting will add significant pressure to this population. As you know, this population also remains severely isolated and states do not have regulations in place to protect bears that could connect with bears outside an arbitrary boundary are likely to be killed. - - Asking for comments on this proposal is premature because state regulations for bears aren't in place, so it's impossible to determine how bears will be managed once federal protections are removed. Please reco Yellowstone bears on the endangered species list. - - Sincerely,

Carla	Brown	Charlottesville	VA	22903	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Human-caused mortality of grizzly bears has been on the rise, and the Yellowstone population ha surrounding states to manage these bears and permit trophy hunting will add significant pressure to this population. As you know, this population also remains severely isolated and states do not have regulations in place to protect bears that could connect with bears outside an arbitrary boundary are likely to be killed. - - Asking for comments on this proposal is premature because state regulations for bears aren't in place, so it's impossible to determine how bears will be managed once federal protections are removed. Please reco Yellowstone bears on the endangered species list. - - Sincerely,

Mary Ann	Black	Caseyville	IL	62232	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Human-caused mortality of grizzly bears has been on the rise, and the Yellowstone population ha surrounding states to manage these bears and permit trophy hunting will add significant pressure to this population. As you know, this population also remains severely isolated and states do not have regulations in place to protect bears that could connect with bears outside an arbitrary boundary are likely to be killed. - - Asking for comments on this proposal is premature because state regulations for bears aren't in place, so it's impossible to determine how bears will be managed once federal protections are removed. Please reco Yellowstone bears on the endangered species list. - - Sincerely,

Please reco Yellowstone bears on the endangered species list. - - Sincerely,
Natalia	Maslennikova	Pervouralsk	ot	623101	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Human-caused mortality of grizzly bears has been on the rise, and the Yellowstone population ha surrounding states to manage these bears and permit trophy hunting will add significant pressure to this population. As you know, this population also remains severely isolated and states do not have regulations in place to protect bears that could connect with bears outside an arbitrary boundary are likely to be killed. - - Asking for comments on this proposal is premature because state regulations for bears aren't in place, so it's impossible to determine how bears will be managed once federal protections are removed. Please reco Yellowstone bears on the endangered species list. - - Sincerely,

Please reco Yellowstone bears on the endangered species list. - - Sincerely,
Glorya	Anderson	AZ	AZ	85715	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Human-caused mortality of grizzly bears has been on the rise, and the Yellowstone population ha surrounding states to manage these bears and permit trophy hunting will add significant pressure to this population. As you know, this population also remains severely isolated and states do not have regulations in place to protect bears that could connect with bears outside an arbitrary boundary are likely to be killed. - - Asking for comments on this proposal is premature because state regulations for bears aren't in place, so it's impossible to determine how bears will be managed once federal protections are removed. Please reco Yellowstone bears on the endangered species list. - - Sincerely,

Andrea	Erickson	NV	NV	89703	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Human-caused mortality of grizzly bears has been on the rise, and the Yellowstone population ha surrounding states to manage these bears and permit trophy hunting will add significant pressure to this population. As you know, this population also remains severely isolated and states do not have regulations in place to protect bears that could connect with bears outside an arbitrary boundary are likely to be killed. - - Asking for comments on this proposal is premature because state regulations for bears aren't in place, so it's impossible to determine how bears will be managed once federal protections are removed. Please reco Yellowstone bears on the endangered species list. - - Sincerely,

Melissa	Burger	Colorado	CO	80829	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Human-caused mortality of grizzly bears has been on the rise, and the Yellowstone population ha surrounding states to manage these bears and permit trophy hunting will add significant pressure to this population. As you know, this population also remains severely isolated and states do not have regulations in place to protect bears that could connect with bears outside an arbitrary boundary are likely to be killed. - - Asking for comments on this proposal is premature because state regulations for bears aren't in place, so it's impossible to determine how bears will be managed once federal protections are removed. Please reco Yellowstone bears on the endangered species list. - - Sincerely,

Human-caused mortality of grizzly bears has been on the rise, and the Yellowstone population ha surrounding states to manage these bears and permit trophy hunting will add significant pressure to this population. As you know, this population also remains severely isolated and states do not have regulations in place to protect bears that could connect with bears outside an arbitrary boundary are likely to be killed. - - Asking for comments on this proposal is premature because state regulations for bears aren't in place, so it's impossible to determine how bears will be managed once federal protections are removed. Please reco Yellowstone bears on the endangered species list. - - Sincerely,
PJ	Clark	Bridgeport	CT	6604	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Human-caused mortality of grizzly bears has been on the rise, and the Yellowstone population ha surrounding states to manage these bears and permit trophy hunting will add significant pressure to this population. As you know, this population also remains severely isolated and states do not have regulations in place to protect bears that could connect with bears outside an arbitrary boundary are likely to be killed. - - Asking for comments on this proposal is premature because state regulations for bears aren't in place, so it's impossible to determine how bears will be managed once federal protections are removed. Sybil	Schweitzer	Beverly Hills	FL	34465	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Human-caused mortality of grizzly bears has been on the rise, and the Yellowstone population ha surrounding states to manage these bears and permit trophy hunting will add significant pressure to this population. As you know, this population also remains severely isolated and states do not have regulations in place to protect bears that could connect with bears outside an arbitrary boundary are likely to be killed. - - Asking for comments on this proposal is premature because state regulations for bears aren't in place, so it's impossible to determine how bears will be managed once federal protections are removed. Please reco Yellowstone bears on the endangered species list. - - Sincerely,

Joanne	Fauci	Lady Lake	FL	32159	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Human-caused mortality of grizzly bears has been on the rise, and the Yellowstone population ha surrounding states to manage these bears and permit trophy hunting will add significant pressure to this population. As you know, this population also remains severely isolated and states do not have regulations in place to protect bears that could connect with bears outside an arbitrary boundary are likely to be killed. - - Asking for comments on this proposal is premature because state regulations for bears aren't in place, so it's impossible to determine how bears will be managed once federal protections are removed. Please reco Yellowstone bears on the endangered species list. - - Sincerely,

Human-caused mortality of grizzly bears has been on the rise, and the Yellowstone population ha surrounding states to manage these bears and permit trophy hunting will add significant pressure to this population. As you know, this population also remains severely isolated and states do not have regulations in place to protect bears that could connect with bears outside an arbitrary boundary are likely to be killed. - - Asking for comments on this proposal is premature because state regulations for bears aren't in place, so it's impossible to determine how bears will be managed once federal protections are removed. Please reco Yellowstone bears on the endangered species list. - - Sincerely,
Alice	West	Twisp	WA	98856	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Human-caused mortality of grizzly bears has been on the rise, and the Yellowstone population ha surrounding states to manage these bears and permit trophy hunting will add significant pressure to this population. As you know, this population also remains severely isolated and states do not have regulations in place to protect bears that could connect with bears outside an arbitrary boundary are likely to be killed. - - Asking for comments on this proposal is premature because state regulations for bears aren't in place, so it's impossible to determine how bears will be managed once federal protections are removed. Patricia	Gaynor	AL	AL	35055	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Human-caused mortality of grizzly bears has been on the rise, and the Yellowstone population ha surrounding states to manage these bears and permit trophy hunting will add significant pressure to this population. As you know, this population also remains severely isolated and states do not have regulations in place to protect bears that could connect with bears outside an arbitrary boundary are likely to be killed. - - Asking for comments on this proposal is premature because state regulations for bears aren't in place, so it's impossible to determine how bears will be managed once federal protections are removed. Please reco Yellowstone bears on the endangered species list. - - Sincerely,
Marjorie	Bergen	Evansville	IN	47715	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. NICK	PAGOULATOS	Salt Lake City	UT	84108	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Human-caused mortality of grizzly bears has been on the rise, and the Yellowstone population ha surrounding states to manage these bears and permit trophy hunting will add significant pressure to this population. As you know, this population also remains severely isolated and states do not have regulations in place to protect bears that could connect with bears outside an arbitrary boundary are likely to be killed. - - Asking for comments on this proposal is premature because state regulations for bears aren't in place, so it's impossible to determine how bears will be managed once federal protections are removed. Please reco Yellowstone bears on the endangered species list. - - Sincerely,
