Donald	Hanek	Little Egg Harbor Township	NJ	8087	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Human-caused mortality of grizzly bears has been on the rise, and the Yellowstone population ha surrounding states to manage these bears and permit trophy hunting will add significant pressure to this population. As you know, this population also remains severely isolated and states do not have regulations in place to protect bears that could connect with bears outside an arbitrary boundary are likely to be killed. - - Asking for comments on this proposal is premature because state regulations for bears aren't in place, so it's impossible to determine how bears will be managed once federal protections are removed. Please reco Yellowstone bears on the endangered species list. - - Sincerely,

Ronald	Merlino	Newfield	NJ	8344	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Human-caused mortality of grizzly bears has been on the rise, and the Yellowstone population ha surrounding states to manage these bears and permit trophy hunting will add significant pressure to this population. As you know, this population also remains severely isolated and states do not have regulations in place to protect bears that could connect with bears outside an arbitrary boundary are likely to be killed. - - Asking for comments on this proposal is premature because state regulations for bears aren't in place, so it's impossible to determine how bears will be managed once federal protections are removed. Please reco Yellowstone bears on the endangered species list. - - Sincerely,

Mary	Totty	Monroe	VA	24574	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Human-caused mortality of grizzly bears has been on the rise, and the Yellowstone population ha surrounding states to manage these bears and permit trophy hunting will add significant pressure to this population. As you know, this population also remains severely isolated and states do not have regulations in place to protect bears that could connect with bears outside an arbitrary boundary are likely to be killed. - - Asking for comments on this proposal is premature because state regulations for bears aren't in place, so it's impossible to determine how bears will be managed once federal protections are removed. Please reco Yellowstone bears on the endangered species list. - - Sincerely,

John	Rybicki	NY	NY	10304	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Human-caused mortality of grizzly bears has been on the rise, and the Yellowstone population ha surrounding states to manage these bears and permit trophy hunting will add significant pressure to this population. As you know, this population also remains severely isolated and states do not have regulations in place to protect bears that could connect with bears outside an arbitrary boundary are likely to be killed. - - Asking for comments on this proposal is premature because state regulations for bears aren't in place, so it's impossible to determine how bears will be managed once federal protections are removed. Please reco Yellowstone bears on the endangered species list. - - Sincerely,

Dani	Johnson	Sharon	PA	16146	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Human-caused mortality of grizzly bears has been on the rise, and the Yellowstone population ha surrounding states to manage these bears and permit trophy hunting will add significant pressure to this population. As you know, this population also remains severely isolated and states do not have regulations in place to protect bears that could connect with bears outside an arbitrary boundary are likely to be killed. - - Asking for comments on this proposal is premature because state regulations for bears aren't in place, so it's impossible to determine how bears will be managed once federal protections are removed. Please reco Yellowstone bears on the endangered species list. - - Sincerely,

Stan	Boder	Pennsylvania	PA	16901	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Human-caused mortality of grizzly bears has been on the rise, and the Yellowstone population ha surrounding states to manage these bears and permit trophy hunting will add significant pressure to this population. As you know, this population also remains severely isolated and states do not have regulations in place to protect bears that could connect with bears outside an arbitrary boundary are likely to be killed. - - Asking for comments on this proposal is premature because state regulations for bears aren't in place, so it's impossible to determine how bears will be managed once federal protections are removed. Please reco Yellowstone bears on the endangered species list. - - Sincerely,

Please reco Yellowstone bears on the endangered species list. - - I worked in Yellowstone as a student, as did my father and my uncles before me. There is very little left of the wilderness that is part of our sacred inheritance and it is our responsibility to preserve and protect this l longer than we have. Please have some respect for the sanctity of life that is sacred even if it is not making money for you. There is more to life than money, profit and greed. We are all connected to everything in life and the greed that has overtaken Americans is goi people with some integrity and reason do not intervene. - Pray for wisdom and do what is right. - - Sincerely,
Linda	Scholten	Clearwater	FL	33756	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Human-caused mortality of grizzly bears has been on the rise, and the Yellowstone population ha surrounding states to manage these bears and permit trophy hunting will add significant pressure to this population. As you know, this population also remains severely isolated and states do not have regulations in place to protect bears that could connect with bears outside an arbitrary boundary are likely to be killed. - - Asking for comments on this proposal is premature because state regulations for bears aren't in place, so it's impossible to determine how bears will be managed once federal protections are removed. Please reco Yellowstone bears on the endangered species list. - - Sincerely,

Hersha	Evans	Christiansburg	VA	24073	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Human-caused mortality of grizzly bears has been on the rise, and the Yellowstone population ha surrounding states to manage these bears and permit trophy hunting will add significant pressure to this population. As you know, this population also remains severely isolated and states do not have regulations in place to protect bears that could connect with bears outside an arbitrary boundary are likely to be killed. - - Asking for comments on this proposal is premature because state regulations for bears aren't in place, so it's impossible to determine how bears will be managed once federal protections are removed. Please reco Yellowstone bears on the endangered species list. - - Sincerely,

Shirley	Vaughn	Encinitas	CA	92024	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Human-caused mortality of grizzly bears has been on the rise, and the Yellowstone population ha surrounding states to manage these bears and permit trophy hunting will add significant pressure to this population. As you know, this population also remains severely isolated and states do not have regulations in place to protect bears that could connect with bears outside an arbitrary boundary are likely to be killed. - - Asking for comments on this proposal is premature because state regulations for bears aren't in place, so it's impossible to determine how bears will be managed once federal protections are removed. Please reco Yellowstone bears on the endangered species list. - - Sincerely,

Maryea	Tupper	Joplin	MO	64801	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Human-caused mortality of grizzly bears has been on the rise, and the Yellowstone population ha surrounding states to manage these bears and permit trophy hunting will add significant pressure to this population. As you know, this population also remains severely isolated and states do not have regulations in place to protect bears that could connect with bears outside an arbitrary boundary are likely to be killed. - - Asking for comments on this proposal is premature because state regulations for bears aren't in place, so it's impossible to determine how bears will be managed once federal protections are removed. Please reco Yellowstone bears on the endangered species list. - - Sincerely,

Please reco Yellowstone bears on the endangered species list. - - Sincerely,
Bridget	Welch	Blaine	MN	55449	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Human-caused mortality of grizzly bears has been on the rise, and the Yellowstone population ha surrounding states to manage these bears and permit trophy hunting will add significant pressure to this population. As you know, this population also remains severely isolated and states do not have regulations in place to protect bears that could connect with bears outside an arbitrary boundary are likely to be killed. - - Asking for comments on this proposal is premature because state regulations for bears aren't in place, so it's impossible to determine how bears will be managed once federal protections are removed. Please reco Yellowstone bears on the endangered species list. - - Sincerely,

Please reco Yellowstone bears on the endangered species list. - - Sincerely,
Martine	Stern	NY	NY	10538	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Human-caused mortality of grizzly bears has been on the rise, and the Yellowstone population ha surrounding states to manage these bears and permit trophy hunting will add significant pressure to this population. As you know, this population also remains severely isolated and states do not have regulations in place to protect bears that could connect with bears outside an arbitrary boundary are likely to be killed. - - Asking for comments on this proposal is premature because state regulations for bears aren't in place, so it's impossible to determine how bears will be managed once federal protections are removed. Please reco Yellowstone bears on the endangered species list. - - Sincerely,

Leslie Ann	Anthomy	Lawrence	NY	11516	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Human-caused mortality of grizzly bears has been on the rise, and the Yellowstone population ha surrounding states to manage these bears and permit trophy hunting will add significant pressure to this population. As you know, this population also remains severely isolated and states do not have regulations in place to protect bears that could connect with bears outside an arbitrary boundary are likely to be killed. - - Asking for comments on this proposal is premature because state regulations for bears aren't in place, so it's impossible to determine how bears will be managed once federal protections are removed. Please reco Yellowstone bears on the endangered species list. - - Sincerely,
Jennifer	Scott	NJ	NJ	8505	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Ellen	Murphy	Bronx	NY	10465	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Human-caused mortality of grizzly bears has been on the rise, and the Yellowstone population ha surrounding states to manage these bears and permit trophy hunting will add significant pressure to this population. As you know, this population also remains severely isolated and states do not have regulations in place to protect bears that could connect with bears outside an arbitrary boundary are likely to be killed. - - Asking for comments on this proposal is premature because state regulations for bears aren't in place, so it's impossible to determine how bears will be managed once federal protections are removed. Please reco Yellowstone bears on the endangered species list. - - Sincerely,

Janice	Troll	Olivet	MI	49076	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Human-caused mortality of grizzly bears has been on the rise, and the Yellowstone population ha surrounding states to manage these bears and permit trophy hunting will add significant pressure to this population. As you know, this population also remains severely isolated and states do not have regulations in place to protect bears that could connect with bears outside an arbitrary boundary are likely to be killed. - - Asking for comments on this proposal is premature because state regulations for bears aren't in place, so it's impossible to determine how bears will be managed once federal protections are removed. Please reco Yellowstone bears on the endangered species list. - - Sincerely,

carina	bakker	amsterdam	NM	10911	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Human-caused mortality of grizzly bears has been on the rise, and the Yellowstone population ha surrounding states to manage these bears and permit trophy hunting will add significant pressure to this population. As you know, this population also remains severely isolated and states do not have regulations in place to protect bears that could connect with bears outside an arbitrary boundary are likely to be killed. - - Asking for comments on this proposal is premature because state regulations for bears aren't in place, so it's impossible to determine how bears will be managed once federal protections are removed. Please reco Yellowstone bears on the endangered species list. - - Sincerely,

Please reco Yellowstone bears on the endangered species list. - - Sincerely,
Tabitha	LaFlamme	New Hamburg	ON	N3A2A5	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Human-caused mortality of grizzly bears has been on the rise, and the Yellowstone population ha surrounding states to manage these bears and permit trophy hunting will add significant pressure to this population. As you know, this population also remains severely isolated and states do not have regulations in place to protect bears that could connect with bears outside an arbitrary boundary are likely to be killed. - - Asking for comments on this proposal is premature because state regulations for bears aren't in place, so it's impossible to determine how bears will be managed once federal protections are removed. Please reco Yellowstone bears on the endangered species list. - - Sincerely,

Please reco Yellowstone bears on the endangered species list. - - Sincerely,
carole	chapman	visalia	CA	93291	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Human-caused mortality of grizzly bears has been on the rise, and the Yellowstone population ha surrounding states to manage these bears and permit trophy hunting will add significant pressure to this population. As you know, this population also remains severely isolated and states do not have regulations in place to protect bears that could connect with bears outside an arbitrary boundary are likely to be killed. - - Asking for comments on this proposal is premature because state regulations for bears aren't in place, so it's impossible to determine how bears will be managed once federal protections are removed. Please reco Yellowstone bears on the endangered species list. - - Sincerely,

Kate	Williams	Maylands	ot	6051	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Human-caused mortality of grizzly bears has been on the rise, and the Yellowstone population ha surrounding states to manage these bears and permit trophy hunting will add significant pressure to this population. As you know, this population also remains severely isolated and states do not have regulations in place to protect bears that could connect with bears outside an arbitrary boundary are likely to be killed. - - Asking for comments on this proposal is premature because state regulations for bears aren't in place, so it's impossible to determine how bears will be managed once federal protections are removed. Please reco Yellowstone bears on the endangered species list. - - Sincerely,

Dana	Bleckinger	Yachats	OR	97498	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Human-caused mortality of grizzly bears has been on the rise, and the Yellowstone population ha surrounding states to manage these bears and permit trophy hunting will add significant pressure to this population. As you know, this population also remains severely isolated and states do not have regulations in place to protect bears that could connect with bears outside an arbitrary boundary are likely to be killed. - - Asking for comments on this proposal is premature because state regulations for bears aren't in place, so it's impossible to determine how bears will be managed once federal protections are removed. Please reco Yellowstone bears on the endangered species list. - - Sincerely,

Erica	Himes	FL	FL	33709	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Human-caused mortality of grizzly bears has been on the rise, and the Yellowstone population ha surrounding states to manage these bears and permit trophy hunting will add significant pressure to this population. As you know, this population also remains severely isolated and states do not have regulations in place to protect bears that could connect with bears outside an arbitrary boundary are likely to be killed. - - Asking for comments on this proposal is premature because state regulations for bears aren't in place, so it's impossible to determine how bears will be managed once federal protections are removed. Please reco Yellowstone bears on the endangered species list. - - Sincerely,

isabelle	golion	courlans	ot	39570	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Human-caused mortality of grizzly bears has been on the rise, and the Yellowstone population ha surrounding states to manage these bears and permit trophy hunting will add significant pressure to this population. As you know, this population also remains severely isolated and states do not have regulations in place to protect bears that could connect with bears outside an arbitrary boundary are likely to be killed. - - Asking for comments on this proposal is premature because state regulations for bears aren't in place, so it's impossible to determine how bears will be managed once federal protections are removed. Please reco Yellowstone bears on the endangered species list. - - Sincerely,
Bernadette	Methven	Highland Park	NJ	8904	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Please reco Yellowstone bears on the endangered species list. - - Sincerely,
Ralph	Richardson	Dronfield	ot	S18 2HS	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Human-caused mortality of grizzly bears has been on the rise, and the Yellowstone population ha surrounding states to manage these bears and permit trophy hunting will add significant pressure to this population. As you know, this population also remains severely isolated and states do not have regulations in place to protect bears that could connect with bears outside an arbitrary boundary are likely to be killed. - - Asking for comments on this proposal is premature because state regulations for bears aren't in place, so it's impossible to determine how bears will be managed once federal protections are removed. Please reco Yellowstone bears on the endangered species list. - - Sincerely,

Please reco Yellowstone bears on the endangered species list. - - Sincerely,
Alan	Peltzer	Parkton	MD	21120	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Human-caused mortality of grizzly bears has been on the rise, and the Yellowstone population ha surrounding states to manage these bears and permit trophy hunting will add significant pressure to this population. As you know, this population also remains severely isolated and states do not have regulations in place to protect bears that could connect with bears outside an arbitrary boundary are likely to be killed. - - Asking for comments on this proposal is premature because state regulations for bears aren't in place, so it's impossible to determine how bears will be managed once federal protections are removed. Please reco Yellowstone bears on the endangered species list. - - Sincerely,

Please reco Yellowstone bears on the endangered species list. - - Removing the grizzly bears' protections makes no sense. The improvement that did happen was only because of the protection. The trophy hunts alone will undo the bears' progress, and undoing their progress is ir connecting animal habitats and making safe passages for them. They still need much help. Please continue the protections! Thank you, Phyllis Lau - - Sincerely,

Human-caused mortality of grizzly bears has been on the rise, and the Yellowstone population ha surrounding states to manage these bears and permit trophy hunting will add significant pressure to this population. As you know, this population also remains severely isolated and states do not have regulations in place to protect bears that could connect with bears outside an arbitrary boundary are likely to be killed. - - Asking for comments on this proposal is premature because state regulations for bears aren't in place, so it's impossible to determine how bears will be managed once federal protections are removed. Please reco Yellowstone bears on the endangered species list. - - Sincerely,
Herminia	Mendez	NJ	NJ	8872	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. martin	babineau	Wisconsin	WI	54814	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Human-caused mortality of grizzly bears has been on the rise, and the Yellowstone population ha surrounding states to manage these bears and permit trophy hunting will add significant pressure to this population. As you know, this population also remains severely isolated and states do not have regulations in place to protect bears that could connect with bears outside an arbitrary boundary are likely to be killed. - - Asking for comments on this proposal is premature because state regulations for bears aren't in place, so it's impossible to determine how bears will be managed once federal protections are removed. Please reco Yellowstone bears on the endangered species list. - - Sincerely,

Cindy	Grigsby	Indiana	IN	47042	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Human-caused mortality of grizzly bears has been on the rise, and the Yellowstone population ha surrounding states to manage these bears and permit trophy hunting will add significant pressure to this population. As you know, this population also remains severely isolated and states do not have regulations in place to protect bears that could connect with bears outside an arbitrary boundary are likely to be killed. - - Asking for comments on this proposal is premature because state regulations for bears aren't in place, so it's impossible to determine how bears will be managed once federal protections are removed. Please reco Yellowstone bears on the endangered species list. - - Sincerely,

Please reco Yellowstone bears on the endangered species list. - - Sincerely,
Lascinda	Goetschius	Fair Lawn	NJ	7410	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Human-caused mortality of grizzly bears has been on the rise, and the Yellowstone population ha surrounding states to manage these bears and permit trophy hunting will add significant pressure to this population. As you know, this population also remains severely isolated and states do not have regulations in place to protect bears that could connect with bears outside an arbitrary boundary are likely to be killed. - - Asking for comments on this proposal is premature because state regulations for bears aren't in place, so it's impossible to determine how bears will be managed once federal protections are removed. Please reco Yellowstone bears on the endangered species list. - - Sincerely,

Please reco Yellowstone bears on the endangered species list. - - Sincerely,
Carol	Jolly	Washington	WA	99207	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Human-caused mortality of grizzly bears has been on the rise, and the Yellowstone population ha surrounding states to manage these bears and permit trophy hunting will add significant pressure to this population. As you know, this population also remains severely isolated and states do not have regulations in place to protect bears that could connect with bears outside an arbitrary boundary are likely to be killed. - - Asking for comments on this proposal is premature because state regulations for bears aren't in place, so it's impossible to determine how bears will be managed once federal protections are removed. Please reco Yellowstone bears on the endangered species list. - - Sincerely,

Please reco Yellowstone bears on the endangered species list. - - Please do not yield to pressure from rich land owners whose main purpose is to gain monetarily from permitted trophy hunts. I have recently been watching a special on PBS regarding our Nation's National Parks. I that it is in their plans also to visit the National Parks as well. These animals need to be protected. Wild animals are losing enough of its habitat through greedy developers and ranchers. Put my tax dollars to good use--Please maintain protections for Yellowstone grizz

Lisa	Dates	NY	NY	13021	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Human-caused mortality of grizzly bears has been on the rise, and the Yellowstone population ha surrounding states to manage these bears and permit trophy hunting will add significant pressure to this population. As you know, this population also remains severely isolated and states do not have regulations in place to protect bears that could connect with bears outside an arbitrary boundary are likely to be killed. - - Asking for comments on this proposal is premature because state regulations for bears aren't in place, so it's impossible to determine how bears will be managed once federal protections are removed. Please reco Yellowstone bears on the endangered species list. - - Sincerely,

Sandra	Hawley	Tukwila	WA	98168	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Human-caused mortality of grizzly bears has been on the rise, and the Yellowstone population ha surrounding states to manage these bears and permit trophy hunting will add significant pressure to this population. As you know, this population also remains severely isolated and states do not have regulations in place to protect bears that could connect with bears outside an arbitrary boundary are likely to be killed. - - Asking for comments on this proposal is premature because state regulations for bears aren't in place, so it's impossible to determine how bears will be managed once federal protections are removed. Please reco Yellowstone bears on the endangered species list. - - Sincerely,

Dennis	Tucker	Danville	IL	61832	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Human-caused mortality of grizzly bears has been on the rise, and the Yellowstone population ha surrounding states to manage these bears and permit trophy hunting will add significant pressure to this population. As you know, this population also remains severely isolated and states do not have regulations in place to protect bears that could connect with bears outside an arbitrary boundary are likely to be killed. - - Asking for comments on this proposal is premature because state regulations for bears aren't in place, so it's impossible to determine how bears will be managed once federal protections are removed. Please reco Yellowstone bears on the endangered species list. - - Sincerely,

MaLu	Mateus	munich	ot	80634	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Human-caused mortality of grizzly bears has been on the rise, and the Yellowstone population ha surrounding states to manage these bears and permit trophy hunting will add significant pressure to this population. As you know, this population also remains severely isolated and states do not have regulations in place to protect bears that could connect with bears outside an arbitrary boundary are likely to be killed. - - Asking for comments on this proposal is premature because state regulations for bears aren't in place, so it's impossible to determine how bears will be managed once federal protections are removed. Please reco Yellowstone bears on the endangered species list. - - Sincerely,

Cambre	Hogoboom	Minneapolis	MN	554112	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Human-caused mortality of grizzly bears has been on the rise, and the Yellowstone population ha surrounding states to manage these bears and permit trophy hunting will add significant pressure to this population. As you know, this population also remains severely isolated and states do not have regulations in place to protect bears that could connect with bears outside an arbitrary boundary are likely to be killed. - - Asking for comments on this proposal is premature because state regulations for bears aren't in place, so it's impossible to determine how bears will be managed once federal protections are removed. Please reco Yellowstone bears on the endangered species list. - - Sincerely,

Please reco Yellowstone bears on the endangered species list. - - Sincerely,
Andrea	Sebo	Oyster Bay	NY	11771	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Human-caused mortality of grizzly bears has been on the rise, and the Yellowstone population ha surrounding states to manage these bears and permit trophy hunting will add significant pressure to this population. As you know, this population also remains severely isolated and states do not have regulations in place to protect bears that could connect with bears outside an arbitrary boundary are likely to be killed. - - Asking for comments on this proposal is premature because state regulations for bears aren't in place, so it's impossible to determine how bears will be managed once federal protections are removed. Please reco Yellowstone bears on the endangered species list. - - Sincerely,

Rosann	Mackey	Grass Valley	CA	95949	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Human-caused mortality of grizzly bears has been on the rise, and the Yellowstone population ha surrounding states to manage these bears and permit trophy hunting will add significant pressure to this population. As you know, this population also remains severely isolated and states do not have regulations in place to protect bears that could connect with bears outside an arbitrary boundary are likely to be killed. - - Asking for comments on this proposal is premature because state regulations for bears aren't in place, so it's impossible to determine how bears will be managed once federal protections are removed. Please reco Yellowstone bears on the endangered species list. - - Sincerely,

Karl	Zedell	Jacksonville	FL	32223	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Human-caused mortality of grizzly bears has been on the rise, and the Yellowstone population ha surrounding states to manage these bears and permit trophy hunting will add significant pressure to this population. As you know, this population also remains severely isolated and states do not have regulations in place to protect bears that could connect with bears outside an arbitrary boundary are likely to be killed. - - Asking for comments on this proposal is premature because state regulations for bears aren't in place, so it's impossible to determine how bears will be managed once federal protections are removed. Please reco Yellowstone bears on the endangered species list. - - Sincerely,

Marie	DAnna	Ridgefield	NJ	7657	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Human-caused mortality of grizzly bears has been on the rise, and the Yellowstone population ha surrounding states to manage these bears and permit trophy hunting will add significant pressure to this population. As you know, this population also remains severely isolated and states do not have regulations in place to protect bears that could connect with bears outside an arbitrary boundary are likely to be killed. - - Asking for comments on this proposal is premature because state regulations for bears aren't in place, so it's impossible to determine how bears will be managed once federal protections are removed. Please reco Yellowstone bears on the endangered species list. - - Sincerely,

Marcine	Mcbride	West Babylon	FL	32940	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Human-caused mortality of grizzly bears has been on the rise, and the Yellowstone population ha surrounding states to manage these bears and permit trophy hunting will add significant pressure to this population. As you know, this population also remains severely isolated and states do not have regulations in place to protect bears that could connect with bears outside an arbitrary boundary are likely to be killed. - - Asking for comments on this proposal is premature because state regulations for bears aren't in place, so it's impossible to determine how bears will be managed once federal protections are removed. Please reco Yellowstone bears on the endangered species list. - - Sincerely,

Tracy	Lioinski	Oak creek	WI	53154	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Human-caused mortality of grizzly bears has been on the rise, and the Yellowstone population ha surrounding states to manage these bears and permit trophy hunting will add significant pressure to this population. As you know, this population also remains severely isolated and states do not have regulations in place to protect bears that could connect with bears outside an arbitrary boundary are likely to be killed. - - Asking for comments on this proposal is premature because state regulations for bears aren't in place, so it's impossible to determine how bears will be managed once federal protections are removed. Please reco Yellowstone bears on the endangered species list. - - Sincerely,
Tammy	Kuhn	Knapp Creek	NY	14760	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Please reco Yellowstone bears on the endangered species list. - - Sincerely,
Patricia	Barclay	Colchester	ot	CO4 3XD	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Human-caused mortality of grizzly bears has been on the rise, and the Yellowstone population ha surrounding states to manage these bears and permit trophy hunting will add significant pressure to this population. As you know, this population also remains severely isolated and states do not have regulations in place to protect bears that could connect with bears outside an arbitrary boundary are likely to be killed. - - Asking for comments on this proposal is premature because state regulations for bears aren't in place, so it's impossible to determine how bears will be managed once federal protections are removed. Please reco Yellowstone bears on the endangered species list. - - Sincerely,

Please reco Yellowstone bears on the endangered species list. - - Sincerely,
Ivonne	Leroux	Corona	NY	11368	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Human-caused mortality of grizzly bears has been on the rise, and the Yellowstone population ha surrounding states to manage these bears and permit trophy hunting will add significant pressure to this population. As you know, this population also remains severely isolated and states do not have regulations in place to protect bears that could connect with bears outside an arbitrary boundary are likely to be killed. - - Asking for comments on this proposal is premature because state regulations for bears aren't in place, so it's impossible to determine how bears will be managed once federal protections are removed. Please reco Yellowstone bears on the endangered species list. - - Sincerely,
Melinda	Threet	TN	TN	37601	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Please reco Yellowstone bears on the endangered species list. - - Sincerely,
Kenneth	Rush	Elizabethtown	KY	42701	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Human-caused mortality of grizzly bears has been on the rise, and the Yellowstone population ha surrounding states to manage these bears and permit trophy hunting will add significant pressure to this population. As you know, this population also remains severely isolated and states do not have regulations in place to protect bears that could connect with bears outside an arbitrary boundary are likely to be killed. - - Asking for comments on this proposal is premature because state regulations for bears aren't in place, so it's impossible to determine how bears will be managed once federal protections are removed. Please reco Yellowstone bears on the endangered species list. - - Sincerely,
Carol	Bradley	Sarasota	FL	34231	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. None should have to die for the fun of the 'thrill killing' 'bait and murder' scum jerks. Their habitats also need protection so they will have the food they need an Sincerely,

As you know, this population also remains severely isolated and states do not have regulations in place to protect bears that could connect with bears outside an arbitrary boundary are likely to be killed. - - Asking for comments on this proposal is premature because state regulations for bears aren't in place, so it's impossible to determine how bears will be managed once federal protections are removed. Please reco Yellowstone bears on the endangered species list. - - Sincerely,
susan	parker	Blue Springs	MO	64015	I am writing to urge you to maintain federal protection for grizzly bears in the Greater Yellowstone Ecosystem -- a population our country has been invested in since 1975. Human-caused mortality of grizzly bears has been on the rise, and the Yellowstone population ha surrounding states to manage these bears and permit trophy hunting will add significant pressure to this population. As you know, this population also remains severely isolated and states do not have regulations in place to protect bears that could connect with bears outside an arbitrary boundary are likely to be killed. - - Asking for comments on this proposal is premature because state regulations for bears aren't in place, so it's impossible to determine how bears will be managed once federal protections are removed.
