I agree Brandon and would've suggested both as handouts, if that's something we are planning to make available on the trip. You could also provide them to the teachers up front as a primer for the students in advance of the trips. I think doing both is probably wise. Any that aren't needed on the first trip can be used on the following ones.

Also, I'm on that "Steppe Up Idaho" campaign team, which is trying to raise awareness of how wildland fires damage sage brush. It's not strictly aimed at the biological effects of fire, but could still be useful. BLM Fire is leading the charge.

Here are some early efforts:

I've shared two of three of them on FB so far. Note: they're planning to integrate the "Why care..." factsheet into another poster/billboard/info product soon. I'll be on a call to discuss next steps tomorrow and will know more then. You're welcome to join in, if you want to and have the time.
