_ working w/ TXDOT

Dr. Andy Gluesenkamp - Herp Guy TPWD 512 - 389 - ~~4800~~ 8722
week of 12 IPAC training - but may not occur

@ Aug 30th or @ Sept 12-14 or Sept @ 20/21
Josh out 2 weeks
Angie out week of 19th

Need GIS Data

discuss site visit, latest on Salado salamanders + locations.

Ask about his involvement for all 4 sal - refer to Alisa for 8 he may have about how involved TPWD can be in process.

★ need landowner permission in writing to do visits (email ok)

Alisa said she thought some new sites for Sal Sal in private land - ask Andy

Need State or local person who has been monitoring sal on site visit

call later if necessary

chippindale - at UT Arlington

★ where do Sal Sal occur - does he have GPS

Notes from Early phone discussion w/ Andy 8-2011

Fairly limited peer-reviewed articles on Eur is grey lit

worked w/ Paul chippendale - have used sect 6 funds to study

Salado - historically known 2-3 springs
Big Bubbly
Bryce Brown - 1950's first
Lazy Days fish farm spring - dug out pool - fish bait operation
little Bubbly - downstream from Salado Spr. - he collected 1
Robertson took 9.

100 yards or so from Big Boiling

☆ Contact chad.Norris@tpwd.state.tx.us
Spring Biologist
writing report
on spring surveys

Glen Langley - anecdotal that he
turned up Sal upstream
he found 3 more pop & private
upstream of Robertson
Spring - one pop doing

Submit information request to TPWD

Salado is downstream range of
dist and habitat is
in bad shape.
Public Park
Old timers care about creek +
sal. But people who
run Salado are new rich
from Austin who want
a master planned community

habitat
hammered

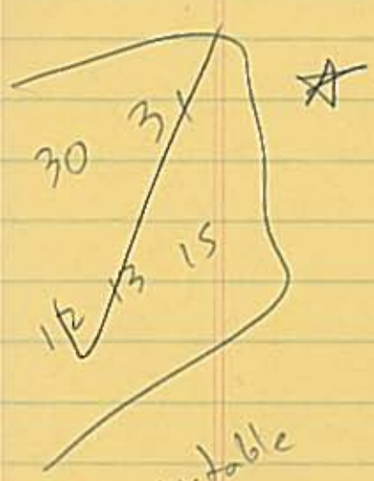
But upper populations are
on ranches + fairly
protected + pops doing well.

spring
flows
fluctuat
a lot
they did spring
flow measurements
Robertson
20cfs
march 2010
march 2011
dry

He has bee
widening I-30 Bridge
he thinks they are doing a good job
Sterling Robertson

upstream sites - owner is supportive
but gun-shy - Andy is
nervous + would rather wait

30 31 15 13 12



☆ Paige has letter - last Report
summary Report on Survey

He is very willing to help - this
is high priority for him

Jessica Crowley - at
Dallas Zoo - all
Salado specimens he
collected sent
live to her for captive
prop - she is only capt. prop for
Salado

unpredictable
Eurycea
hard to
breed

San Marcos
still working
on "triggers"
for breeding

Only Georgetown - not currently
captive
prop.

not confirmed

only known at springs but
students saw
Ben Pierce - SW Univ.
2 students saw big
white sal during high
flows

can only
be Georgetown

water tank
cave
big pale sal

po
Cobb Spring - hand dug well
Andy saw larger pale in well
