Charlie -

Can you provide a version that shows your changes? Let's discuss this Tuesday morning.

Thanks.

Patty

and a couple random notes:

- Gina, I agree w/ MOST of your comments/ questions; however, many of these were highlighted early on in the Draft BA, and thereafter, but never resolved/ answered due to BLM's reticence; not sure we can belabor it further
- I really overhauled the BA copy and paste sections, wordsmithing for several days; hopefully it's at a point deemed acceptable although I agree that its repetitive, kinda wonky, not very direct or clear, etc.; but you should have seen it before...
- I deleted language regarding BLM's (unbiased) opinions (i.e., "this is a problem with historic grazing, and current grazing is awesome compared to the old days"); obviously, these were areas where I disagreed w/ statements/ conclusions, and it showed
- We're kind of stuck between a rock and a hard place, given that we believe the conservation measures are insufficient, but must find no jeopardy
- waiting for RMPs, I think and agree, would be hugely beneficial; not sure BLM will bite though
- Gina, in response to your very last comment, see my notes in red

Have a good weekend.
