Hi. Totally up to you: I can step off my call at 3 but if you are good, that's cool, too. Either say, I'll send you a couple additional items by COB today to round out the information I sent prior. Thanks.

> Morning, Stephenne. Hope your travels are going well. Please see attached several map from our MT field office:

The latest MT core areas (which are identical to PACs with the exception of a new MT core area added in Garfield/McCone County) are shown on the attached "GRSG strategy 29Jan_finalmap", which also shows the latest general sage-grouse distribution as mapped by MT FWP. I've also attached a map of the potential "special management" core areas that we discussed yesterday, along with a FWP map showing leks and the basis for their core mapping, a BLM planning area map, and a 2010 range-wide breeding density map.
