Thanks Jim!

And while we don't use it too often, I removed GRSG from the county lists in the file "WY County Spp Lists.xlsx"

Subject: GRSG info updated on WYES Website

I just updated our website to switch Sage-Grouse from 'Listed, Proposed, and Candidate' to 'Species of Concern.' It should only show up under Species of Concern now. I also updated the Sage-Grouse page to remove Status and AOI information. The potential distribution map uses the AOI data layer but it is no longer an AOI and that information no longer applies (at least as I understand it).

If you find something I missed, send it my way. And as always, let me know if you find any errors.

Thanks,
Jim
