Brian,

Good idea. Also let me introduce Lara. She's been with us two whole weeks now. She's just beginining to look into mapping seasonal habitat so it would be good for the three of us to talk. Would you be available between 8 and 10 am MT (I seem to recall you are PT so that might be early...) or between 11 and noon MT on 11/26?

I'm hoping you'll have a little time to discuss these ideas during the next couple of weeks. In particular, I'm interested in any west-wide spatial data pertaining to sage-steppe habitat conditions (or even just a good vegetation layer that reliably shows sage v. grassland v modified habitat).
