Sorry it took a bit to get back to you, I was in a meeting all day. Here's the original WAFWA populations. If there's any problems with it let me know.

Thanks Jim,
My memory is failing. Just send the original WAFWA populations.

Subject Re: Latest PAC Draft Map

Hey Steve,

The populations for the Threat risk map in the report are not the WAFWA Populations. We started with the WAFWA Populations and then modified them to better align populations with the PACs and the states determinations. This was all done at the meeting we had in Reno. As I said on the call I believe the COT populations need to be further

modified/refined or removed completely.

So, did you want me to send you the WAFWA Populations or the COT Populations? Or both? Just keep in mind the COT Populations will be changing.

Jim

Hey Jim,
I think I have the correct layers but just in case could you send me the spatial data from the 2004 WAFWA assessment (Connelly et al 2004) depicting the sage-grouse population/subpopulations? This is the underlying data in figure 2 in the COT report, isn't it? Or did you manipulate Figure 2 (not counting the risk colors).
thanks - steve

```

Here is the latest draft map of the Sag-Grouse PACs. I also added the current Sage-Grouse Range.
