Hi Mike,

This list is on the process of being created to assist with the sage-grouse listing decision. It will inform an internet database that states and agencies will be able to use to provide the Service with information (primarily conservation actions / efforts) that benefit sage-grouse.

It's not being cross-walked in TAILS (not the intent)... however, all that said, I'd be happy to keep you informed as we get closer to a finalized list and you can use it if/when/where it benefits your effort. As I mentioned to Kate, I'm available tomorrow and next week if you would like to discuss this or if I can be of any help.

Take care,

crazy that this is draft, VERY much not ready for distribution, and will likely change.

It seems a bit like what he's doing with Activities/Subactivities is similar to what you and Tara have done with the IPaC work. I don't know how far along they are with this process, but it occurred to me that we might be able to share some resources (e.g. the list of activities) so - MAYBE - we can all use the same language. I'd love for this to be integrated into ECOS some day.

Thoughts?

K

Hi Kate,

Here's a draft version of the metrics table we've worked on... It'll change after next week's discussions and I can provide you with updated versions if that helps. This is still under review from other agencies and the states.
Also attached is the 'in-progress' draft of the definitions.
