Hi Kevin and all,

I received the SPPI model data today from Sean, thank you. It is stored on my local drive. I am still refining the wind development probability model I am creating and haven't analyzed the SPPI data with it, and will not do so until I get more direction from Bridget.

Thanks!
Lara

Sean Fields is bundling the SPPI data today. I personally do not have a problem sharing the data. I would however like to make sure work is coordinated with the habitat effort so the USFWS does not have a communication problem with our parters in MT, ND, & SD. As long as Clint and Bridget our on the same page, I have no worries.
