Subject:	Re: Name for our SG Listing Decision LC MAP data community
Date:	Friday, May 02, 2014 10:43:25 AM

We now have a Community called: Sage Grouse Conservation Status 2015 on LC MAP/ScienceBase. The direct URL is: https://www.sciencebase.gov/catalog/item/5363b604e4b08180b0142557

and it is a 'top level' community meaning if you browse for it using the Community list (https://www.sciencebase.gov/catalog/community/list) or in the folders, you'll find it in alphabetical order (that is, not under LC MAP or any other community). Currently everyone on this list plus a few key others have permissions in the Community ... we can change that as needed. Also I listed the contacts as Matt Heller, Kevin Doherty, and me. We can change that to if needed.

The Sage Grouse Conservation Efforts Database was moved to a sub-community of the above.

We can run through a demo if needed next time we get together.

Prehaps we're making something out of nothing since the actual URL will be a random address (i.e., https://www.sciencebase.gov/catalog/folder/52015a07e4b009d47a4c2507) but the

name we use will be in the folder tree.

How about: Sage Grouse Conservation Status 2015

then we'll fold the existing Sage grouse Conservation Efforts Database inside the above/

Not trying to be difficult, but GSG can mean a lot of things. Plus, I thought comparable names were like this "Gulf Coastal Plains and Ozarks Landscape Conservation Cooperative", etc.

Can it be literal and not an acronym? Does it have to be one word?

Thanks Kate,

I'm sending this to the full team, which I should have done in the original email. I think it might be nice to have a time-stamp in the title to keep it clear that this isn't the 2010 review for people looking at this in ten years, so what about "2015 GR Sage-grouse Status Review"? It isn't real short, but I don't believe this will impact URLs that people would ever be typing (I think they'd just be clicking links).

Thoughts?
Lara
