Lynn,

I'm emailing you from Lajitas, Texas of all places. I just spent the last few days bicycling through Big Bend National Park and have a couple more days before I end my bike adventure and make a mad dash back to Laramie.

There will be no water depletions with the Pleasant Pit mining operation. I apologize that I didn't say so in the letter.

Sincerely,

Amber

Hi Amber, You voice mail said you were out but I left a message today. I'm sending you an e-mail as well. I will be out of the office all next week but will check e-mails sporadically as I can. My one question is if there is any depletions anticipated of the Green River? It did not say anything in your letter. We may have concerns with that issue. We can send you back in our response letter with updated information on sage-grouse concerns because of the impact to sage-brush. We can touch on raptor concerns as well with recommendations. If you can respond by e-mail, that would work better for now. Thanks, Lynn
